# QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 For the quarterly period ended February 28, 2017

OR

□ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number: 1-7102

# NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORPORATION

(Exact name of registrant as specified in its charter)

**District of Columbia** 

**52-0891669** (I.R.S. employer identification no.)

(State or other jurisdiction of incorporation or organization)

20701 Cooperative Way, Dulles, Virginia, 20166

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (703) 467-1800

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  $\boxtimes$  No  $\square$ 

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T ( $\S232.405$  of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  $\boxtimes$  No  $\square$ 

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  $\Box$ 

Accelerated filer  $\Box$  Non-accelerated filer  $\boxtimes$  (Do not check if a smaller reporting company)

Smaller reporting company  $\Box$ 

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes 🗆 No 🖾

#### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A")

#### FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains certain statements that are considered "forward-looking statements" within the Securities Act of 1933, as amended, and the Exchange Act of 1934, as amended. Forward-looking statements, which are based on certain assumptions and describe our future plans, strategies and expectations, are generally identified by our use of words such as "intend," "plan," "may," "should," "will," "project," "estimate," "anticipate," "believe," "expect," "continue," "potential," "opportunity" and similar expressions, whether in the negative or affirmative. All statements about future expectations or projections, including statements about loan volume, the appropriateness of the allowance for loan losses, operating income and expenses, leverage and debt-to-equity ratios, borrower financial performance, impaired loans, and sources and uses of liquidity, are forward-looking statements. Although we believe that the expectations reflected in our forward-looking statements are based on reasonable assumptions, actual results and performance may differ materially from our forward-looking statements due to several factors. Factors that could cause future results to vary from our forwardlooking statements include, but are not limited to, general economic conditions, legislative changes including those that could affect our tax status, governmental monetary and fiscal policies, demand for our loan products, lending competition, changes in the quality or composition of our loan portfolio, changes in our ability to access external financing, changes in the credit ratings on our debt, valuation of collateral supporting impaired loans, charges associated with our operation or disposition of foreclosed assets, regulatory and economic conditions in the rural electric industry, nonperformance of counterparties to our derivative agreements, the costs and effects of legal or governmental proceedings involving us or our members and the factors listed and described under "Item 1A. Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended May 31, 2016 ("2016 Form 10-K"). Except as required by law, we undertake no obligation to update or publicly release any revisions to forward-looking statements to reflect events, circumstances or changes in expectations after the date on which the statement is made.

#### INTRODUCTION

National Rural Utilities Cooperative Finance Corporation ("CFC") is a member-owned cooperative association incorporated under the laws of the District of Columbia in April 1969. CFC's principal purpose is to provide its members with financing to supplement the loan programs of the Rural Utilities Service ("RUS") of the United States Department of Agriculture ("USDA"). CFC makes loans to its rural electric members so they can acquire, construct and operate electric distribution, generation, transmission and related facilities. CFC also provides its members with credit enhancements in the form of letters of credit and guarantees of debt obligations. As a cooperative, CFC is owned by and exclusively serves its membership, which consists of not-for-profit entities or subsidiaries or affiliates of not-for-profit entities. CFC is exempt from federal income taxes. As a member-owned cooperative, CFC's objective is not to maximize profit, but rather to offer its members cost-based financial products and services consistent with sound financial management. CFC funds its activities primarily through a combination of public and private issuances of debt securities, member investments and retained equity. As a tax-exempt, member-owned cooperative, we cannot issue equity securities.

Our financial statements include the consolidated accounts of CFC, Rural Telephone Finance Cooperative ("RTFC"), National Cooperative Services Corporation ("NCSC") and subsidiaries created and controlled by CFC to hold foreclosed assets resulting from borrower defaults on loans or bankruptcy proceedings. RTFC is a taxable Subchapter T cooperative association that was established to provide private financing for the rural telecommunications industry. NCSC is a taxable cooperative that may provide financing to members of CFC, government or quasi-government entities which own electric utility systems that meet the Rural Electrification Act definition of "rural", and the for-profit and nonprofit entities that are owned, operated or controlled by, or provide significant benefits to certain members of CFC. See "Item 1. Business— Overview" of our 2016 Form 10-K for additional information on the business activities of each of these entities. Unless stated otherwise, references to "we," "our" or "us" relate to CFC and its consolidated entities. All references to members within this document include members, associates and affiliates of CFC and its consolidated entities. Management monitors a variety of key indicators to evaluate our business performance. The following MD&A is intended to provide the reader with an understanding of our results of operations, financial condition and liquidity by discussing the drivers of changes from period to period and the key measures used by management to evaluate performance, such as leverage ratios, growth and credit quality metrics. MD&A is provided as a supplement to, and should be read in conjunction with our unaudited condensed consolidated financial statements and related notes in this Report, our audited consolidated financial statements and related notes in our 2016 Form 10-K and additional information contained in our 2016 Form 10-K, including the risk factors discussed under "Part I—Item 1A. Risk Factors," as well as any risk factors identified under "Part II—Item 1A. Risk Factors" in this Report.

#### SUMMARY OF SELECTED FINANCIAL DATA

Table 1 provides a summary of selected financial data for the three and nine months ended February 28, 2017 and February 29, 2016, and as of February 28, 2017 and May 31, 2016. In addition to financial measures determined in accordance with GAAP, management also evaluates performance based on certain non-GAAP measures, which we refer to as "adjusted" measures. Our primary non-GAAP metrics include adjusted net income, adjusted net interest income and net interest yield, adjusted times interest earned ratio ("adjusted TIER"), adjusted debt-to-equity ratio and adjusted leverage ratio. The most comparable GAAP measures are net income, net interest income, TIER, debt-to-equity ratio and leverage ratio, respectively. The primary adjustments we make to calculate these non-GAAP measures consist of (i) adjusting interest expense and net interest income to include the impact of net periodic derivative cash settlements; (ii) adjusting net income, senior debt and total equity to exclude the non-cash impact of the accounting for derivative financial instruments; (iii) adjusting senior debt to exclude the amount that funds CFC member loans guaranteed by RUS, subordinated deferrable debt and members' subordinated certificates; and (iv) adjusting total equity to include subordinated deferrable debt and members' subordinated certificates. We believe our non-GAAP adjusted metrics, which are not a substitute for GAAP and may not be consistent with similarly titled non-GAAP measures used by other companies, provide meaningful information and are useful to investors because management evaluates performance based on these metrics, and the financial covenants in our committed bank revolving line of credit agreements and debt indentures are based on adjusted TIER and the adjusted debt-to-equity ratio. See "Non-GAAP Financial Measures" for a detailed reconciliation of these adjusted measures to the most comparable GAAP measures.

\*\* Change is less than one percent or not meaningful.

- (1) Consists of derivative cash settlements and derivative forward value amounts. Derivative cash settlement amounts represent net periodic contractual interest accruals related to derivatives not designated for hedge accounting. Derivative forward value amounts represent changes in fair value during the period, excluding net periodic contractual accruals, related to derivatives not designated for hedge accounting and expense amounts reclassified into income related to the cumulative transition loss recorded in accumulated other comprehensive income as of June 1, 2001, as a result of the adoption of the derivative accounting guidance that required derivatives to be reported at fair value on the balance sheet.
- <sup>(2)</sup>Consists of the salaries and employee benefits and the other general and administrative expenses components of non-interest expense, each of which are presented separately on our consolidated statements of operations.
- <sup>(3)</sup>See "Non-GAAP Financial Measures" for details on the calculation of these non-GAAP adjusted measures and the reconciliation to the most comparable GAAP measures.
- (4)Calculated based on net income (loss) plus interest expense for the period divided by interest expense for the period. The fixed-charge coverage ratios and TIER were the same during each period presented because we did not have any capitalized interest during these periods. For the three months ended February 29, 2016, we reported a net loss of \$174 million, which resulted in no fixed-charge coverage ratio and TIER coverage.
- <sup>(5)</sup>Loans to members consists of the outstanding principal balance of member loans plus unamortized deferred loan origination costs, which totaled \$11 million and \$10 million as of February 28, 2017 and May 31, 2016, respectively.
- <sup>(6)</sup>Reflects the total amount of member obligations for which CFC has guaranteed payment to a third party as of the end of each period. This amount represents our maximum exposure to loss, which significantly exceeds the guarantee liability recorded on our consolidated balance sheets as the guarantee liability is determined based on anticipated losses. See "Note 11—Guarantees" for additional information.
- <sup>(7)</sup>Calculated based on total liabilities and guarantees at period end divided by total equity at period end.
- <sup>(8)</sup>Calculated based on total liabilities at period end divided by total equity at period end.

#### **EXECUTIVE SUMMARY**

Our primary objective as a member-owned cooperative lender is to provide cost-based financial products to our rural electric members while maintaining a sound financial position required for investment-grade credit ratings on our debt instruments. Our objective is not to maximize net income; therefore, the rates we charge our member-borrowers reflect our adjusted interest expense plus a spread to cover our operating expenses, a provision for loan losses and earnings sufficient to achieve interest coverage to meet our financial objectives. Our goal is to earn an annual minimum adjusted TIER of 1.10 and to maintain an adjusted debt-to-equity ratio at approximatively or below 6.00-to-1.

We are subject to period-to-period volatility in our reported GAAP results due to changes in market conditions and differences in the way our financial assets and liabilities are accounted for under GAAP. Our financial assets and liabilities expose us to interest-rate risk. We use derivatives, primarily interest rate swaps, as part of our strategy in managing this risk. Our derivatives are intended to economically hedge and manage the interest-rate sensitivity mismatch between our financial assets and liabilities. We are required under GAAP to carry derivatives at fair value on our consolidated balance sheet; however, our other financial assets and liabilities are carried at amortized cost. Changes in interest rates and spreads result in periodic fluctuations in the fair value of our derivatives, which may cause volatility in our earnings because we do not apply hedge accounting. As a result, the mark-to-market changes in our derivatives are recorded in earnings. Based on the composition of our derivatives, we generally record derivative losses in earnings when interest rates decline and derivative gains when interest rates rise. This earnings volatility generally is not indicative of the underlying economics of our business, as the derivative forward fair value gains or losses recorded each period may or may not be realized over time, depending on the terms of our derivative instruments and future changes in market conditions that impact actual derivative cash settlement amounts. As such, management uses our adjusted non-GAAP results, which include realized net periodic derivative settlements but exclude the impact of unrealized derivative forward fair value gains and losses, to evaluate our operating performance. Because derivative forward fair value gains and losses do not impact our cash flows, liquidity or ability to service our debt costs, our financial debt covenants are also based on our non-GAAP adjusted results.

#### **Financial Performance**

#### **Reported Results**

We reported net income of \$98 million and a TIER of 1.52 for the quarter ended February 28, 2017 ("current quarter"), compared with a net loss of \$174 million for the same prior-year quarter, which resulted in no TIER coverage for the prior-year quarter. We reported net income of \$361 million and a TIER of 1.65 for the nine months ended February 28, 2017, compared with a net loss of \$156 million and a TIER of 0.69 for the same prior-year period. Our debt-to-equity ratio decreased to 21.32-to-1 as of February 28, 2017, from 28.69-to-1 as of May 31, 2016, largely attributable to an increase in

equity resulting from our reported net income of \$361 million for the nine months ended February 28, 2017, which was partially offset by patronage capital retirements totaling \$43 million.

The variance of \$272 million between our reported net income of \$98 million for the current quarter and net loss of \$174 million for the same prior-year quarter was primarily driven by mark-to-market changes in the fair value of our derivatives. We recognized derivative gains of \$42 million in the current quarter, largely due to an overall increase in interest rates during the quarter. In contrast, we recognized derivative losses of \$243 million in the same prior year quarter due to a decline in longer-term interest rates and flattening of the swap yield curve. The favorable impact of the shift of \$285 million to derivative gains in the current quarter from derivative losses in the same prior-year quarter was partially offset by a reduction in net interest income of \$9 million, resulting from a decrease in the net interest yield of 21 basis points to 1.19%, which was partially offset by an increase in average interest-earning assets of 6%.

The variance of \$517 million between our reported net income of \$361 million for the nine months ended February 28, 2017 and our net loss of \$156 million for the same prior-year period also was driven primarily by mark-to-market changes in the fair value of our derivatives. We recognized derivative gains of \$195 million for the nine months ended February 28, 2017 attributable to an overall increase in interest rates, compared with derivative losses of \$356 million during the same prior-year period attributable to a flattening of the swap yield curve resulting from an increase in short-term interest rates and a decline in longer-term interest rates. The variance between periods also reflects a reduction in net interest income of \$30 million, attributable to a decrease in the net interest yield of 25 basis points to 1.22%, which was partially offset by an increase in average interest-earning assets of 7%.

#### Adjusted Non-GAAP Results

Our adjusted net income totaled \$36 million and our adjusted TIER was 1.18 for the current quarter, compared with adjusted net income of \$46 million and adjusted TIER of 1.24 for the same prior-year quarter. Our adjusted net income totaled \$102 million and our adjusted TIER was 1.17 for the nine months ended February 28, 2017, compared with adjusted net income of \$135 million and adjusted TIER of 1.24 for the same prior-year period. Our adjusted debt-to-equity ratio increased to 6.11-to-1 as of February 28, 2017, from 5.82-to-1 as of May 31, 2016, largely due to an increase in debt outstanding to fund asset growth.

The decreases in adjusted net income in the current quarter and nine months ended February 28, 2017 from the same prioryear periods were primarily driven by a decrease in adjusted net interest income attributable to a reduction in the adjusted net interest yield by 15 basis points to 0.87% for the current quarter and by 23 basis points to 0.86% for the nine months ended February 28, 2017. The decrease in the adjusted net interest yield during each period was partially offset by the increase in average interest-earning assets of 6% and 7% in the current quarter and nine months ended February 28, 2017, respectively.

#### Lending Activity

Total loans outstanding, which consists of the unpaid principal balance and excludes deferred loan origination costs, was \$24,250 million as of February 28, 2017, an increase of \$1,098 million, or 5%, from May 31, 2016. The increase was primarily due to increases in CFC distribution and power supply loans of \$1,016 million and \$121 million, respectively, which were largely attributable to member advances for capital investments and members refinancing with us loans made by other lenders.

CFC had long-term fixed-rate loans totaling \$792 million that repriced during the nine months ended February 28, 2017. Of this total, \$659 million repriced to a new long-term fixed rate, \$112 million repriced to a long-term variable rate and \$22 million were repaid in full.

#### **Financing Activity**

Our outstanding debt volume generally increases and decreases in response to member loan demand. As outstanding loan balances increased during the nine months ended February 28, 2017, our debt volume also increased. Total debt outstanding was \$23,805 million as of February 28, 2017, an increase of \$1,207 million, or 5%, from May 31, 2016. The increase was primarily attributable to a net increase in commercial paper outstanding of \$476 million, a net increase in notes payable

under the note purchase agreements with the Federal Agricultural Mortgage Corporation ("Farmer Mac") of \$321 million, a net increase in notes payable to the Federal Financing Bank under the Guaranteed Underwriter Program of the USDA ("Guaranteed Underwriter Program") of \$221 million, a net increase in collateral trust bonds of \$153 million and a net increase in medium-term notes of \$85 million.

During the nine months ended February 28, 2017, we issued \$750 million aggregate principal amount of dealer mediumterm notes and collateral trust bonds and received advances of \$600 million under the Guaranteed Underwriter Program and the revolving note purchase agreements with Farmer Mac.

On December 1, 2016, we closed on a \$375 million committed loan facility ("Series L") from the Federal Financing Bank guaranteed by RUS pursuant to the Guaranteed Underwriter Program. Under the Series L facility, we are able to borrow any time before October 15, 2019, with each advance subject to quarterly amortization and a final maturity not longer than 20 years from the advance date. As a result of this new commitment, the total for committed facilities under the Guaranteed Underwriter Program increased to \$5,798 million, with up to \$725 million available under these facilities as of February 28, 2017.

We provide additional information on our financing activities under "Consolidated Balance Sheets Analysis—Debt" and "Liquidity Risk."

#### Sale of CAH

On July 1, 2016, the sale of Caribbean Asset Holdings, LLC ("CAH") to ATN VI Holdings, LLC ("Buyer") was completed. As a result, we did not carry any foreclosed assets on our consolidated balance sheet as of February 28, 2017. Our net proceeds at closing totaled \$109 million, which represents the purchase price of \$144 million less agreed-upon purchase price adjustments as of the closing date. Upon closing, \$16 million of the sale proceeds was deposited into escrow to fund potential indemnification claims for a period of 15 months following the closing. In connection with the sale, RTFC provided a loan in the amount of \$60 million to Buyer to finance a portion of the transaction. ATN International, Inc., the parent corporation of Buyer, has provided a guarantee on an unsecured basis of Buyer's obligations to RTFC pursuant to the financing.

The net proceeds at closing were subject to post-closing adjustments. The Buyer provided a statement of post-closing adjustments and we agreed upon a net amount due to us for post-closing adjustments of approximately \$1 million, which we received during the second quarter of fiscal year 2017. See "Consolidated Results of Operations—Non-Interest Income— Results of Operations of Foreclosed Assets" below in this Report and "Note 5—Foreclosed Assets" in our 2016 Form 10-K for additional information on the sale of CAH.

#### **Outlook for the Next 12 Months**

We currently expect the amount of long-term loan advances to slightly exceed anticipated loan repayments over the next 12 months. We expect relatively flat net interest income and adjusted net interest income over the next 12 months, reflecting a slight projected increase in average total loans, which we anticipate will be offset by a projected modest decline in the net interest yield and adjusted net interest yield.

Long-term debt scheduled to mature over the next 12 months totaled \$2,590 million as of February 28, 2017. Of this amount, we have long-term debt totaling \$1,440 million that matures in the fourth quarter of fiscal year 2017. We believe we have sufficient liquidity from the combination of existing cash and time deposits, member loan repayments, committed bank revolving lines of credit and our ability to issue debt in the capital markets, to our members and in private placements to meet the demand for member loan advances and satisfy our obligations to repay long-term debt maturing over the next 12 months. As of February 28, 2017, we had access to liquidity reserves totaling \$6,931 million, which consisted of (i) \$866 million in cash and cash equivalents and time deposits, (ii) up to \$725 million available under committed loan facilities from the Federal Financing Bank under the Guaranteed Underwriter Program, (iii) up to \$3,164 million available under committed revolving note purchase agreement with Farmer Mac, and (v) up to \$1,976 million available under a revolving note purchase agreement with Farmer Mac, subject to market conditions.

We believe we can continue to roll over the member outstanding short-term debt of \$2,348 million as of February 28, 2017, based on our expectation that our members will continue to reinvest their excess cash in our commercial paper, daily liquidity fund, select notes and medium-term notes. We expect to continue to roll over our outstanding dealer commercial paper of \$1,040 million as of February 28, 2017. We intend to manage our short-term wholesale funding risk by maintaining outstanding dealer commercial paper at an average amount below \$1,250 million for the foreseeable future. We expect to continue to be in compliance with the covenants under our committed bank revolving line of credit agreements, which will allow us to mitigate our roll-over risk as we can draw on these facilities to repay dealer or member commercial paper that cannot be rolled over.

While we are not subject to bank regulatory capital rules, we generally aim to maintain an adjusted debt-to-equity ratio at approximately or below 6.00-to-1. Our adjusted debt-to-equity ratio was 6.11 as of February 28, 2017, slightly above our targeted threshold. We expect to maintain our adjusted debt-to-equity ratio at approximately 6.00-to-1 over the next 12 months.

# CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with GAAP requires management to make a number of judgments, estimates and assumptions that affect the amount of assets, liabilities, income and expenses in the consolidated financial statements. Understanding our accounting policies and the extent to which we use management's judgment and estimates in applying these policies is integral to understanding our financial statements. We provide a discussion of our significant accounting policies under "Note 1—Summary of Significant Accounting Policies" in our 2016 Form 10-K.

We have identified certain accounting policies as critical because they involve significant judgments and assumptions about highly complex and inherently uncertain matters, and the use of reasonably different estimates and assumptions could have a material impact on our results of operations or financial condition. Our most critical accounting policies and estimates involve the determination of the allowance for loan losses and fair value. We evaluate our critical accounting estimates and judgments required by our policies on an ongoing basis and update them as necessary based on changing conditions. There were no material changes in the assumptions used in our critical accounting policies and estimates during the current quarter. Management has discussed significant judgments and assumptions in applying our critical accounting policies with the Audit Committee of our board of directors. We provide information on the methodologies and key assumptions used in our critical accounting policies and estimates "in our 2016 Form 10-K. See "Item 1A. Risk Factors" in our 2016 Form 10-K for a discussion of the risks associated with management's judgments and estimates in applying our accounting policies and methods.

# ACCOUNTING CHANGES AND DEVELOPMENTS

See "Note 1—Summary of Significant Accounting Policies" for information on accounting standards adopted during the nine months ended February 28, 2017, as well as recently issued accounting standards not yet required to be adopted and the expected impact of these accounting standards. To the extent we believe the adoption of new accounting standards has had or will have a material impact on our results of operations, financial condition or liquidity, we discuss the impact in the applicable section(s) of MD&A.

## CONSOLIDATED RESULTS OF OPERATIONS

The section below provides a comparative discussion of our condensed consolidated results of operations between the three months ended February 28, 2017 and February 29, 2016 and between the nine months ended February 28, 2017 and February 29, 2016. Following this section, we provide a comparative analysis of our condensed consolidated balance sheets as of February 28, 2017 and May 31, 2016. You should read these sections together with our "Executive Summary— Outlook for the Next 12 Months" where we discuss trends and other factors that we expect will affect our future results of operations.

#### **Net Interest Income**

Net interest income represents the difference between the interest income and applicable fees earned on our interest-earning assets, which include loans and investment securities, and the interest expense on our interest-bearing liabilities. Our net interest yield represents the difference between the yield on our interest-earning assets and the cost of our interest-bearing liabilities plus the impact from non-interest bearing funding. We expect net interest income and our net interest yield to fluctuate based on changes in interest rates and changes in the amount and composition of our interest-earning assets and interest-bearing liabilities. We do not fund each individual loan with specific debt. Rather, we attempt to minimize costs and maximize efficiency by funding large aggregated amounts of loans.

Table 2 presents our average balance sheets for the three and nine months ended February 28, 2017 and February 29, 2016, and for each major category of our interest-earning assets and interest-bearing liabilities, the interest income earned or interest expense incurred, and the average yield or cost. Table 2 also presents non-GAAP adjusted interest expense, adjusted net interest yield, which reflect the inclusion of net accrued periodic derivative cash settlements in interest expense. We provide reconciliations of our non-GAAP adjusted measures to the most comparable GAAP measures under "Non-GAAP Financial Measures."

Adjusted interest expense/adjusted average cost <sup>(8)</sup> \$ 615,8053.55%\$ 569,298	3.48%
Adjusted net interest spread <sup>(4)</sup> 0.68%	0.92%
Impact of non-interest bearing funding 0.18	0.17
Adjusted net interest income/adjusted net interest yield <sup>(9)</sup> \$ 158,106       0.86%	

<sup>(1)</sup>Interest income includes loan conversion fees, which are generally deferred and recognized in interest income using the effective interest method.

<sup>(2)</sup>Troubled debt restructuring ("TDR") loans.

<sup>(3)</sup>Consists of late payment fees and net amortization of deferred loan fees and loan origination costs.

<sup>(4)</sup>Net interest spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing funding. Adjusted net interest spread represents the difference between the average yield on interest-earning assets and the adjusted average cost of interest-bearing funding. <sup>(5)</sup>Includes other liabilities and equity.

<sup>(6)</sup>Net interest yield is calculated based on annualized net interest income for the period divided by average interest-earning assets for the period.

- <sup>(7)</sup>Represents the impact of net accrued periodic derivative cash settlements during the period, which is added to interest expense to derive non-GAAP adjusted interest expense. The average (benefit)/cost associated with derivatives is calculated based on the annualized net accrued periodic derivative cash settlements during the period divided by the average outstanding notional amount of derivatives during the period. The average outstanding notional amount of derivatives are period. The average outstanding notional amount of derivatives was \$10,610 million and \$10,082 million for the three months ended February 28, 2017 and February 29, 2016, respectively. The average outstanding notional amount of derivatives was \$10,532 million and \$9,930 million for the nine months ended February 28, 2017 and February 29, 2016, respectively.
- <sup>(8)</sup>Adjusted interest expense represents interest expense plus net accrued derivative cash settlements during the period. Net accrued derivative cash settlements are reported on our consolidated statements of operations as a component of derivative gains (losses). Adjusted average cost is calculated based on annualized adjusted interest expense for the period divided by average interest-bearing funding during the period.
- (9) Adjusted net interest yield is calculated based on annualized adjusted net interest income for the period divided by average interest-earning assets for the period.

Table 3 displays the change in our net interest income between periods and the extent to which the variance is attributable to: (i) changes in the volume of our interest-earning assets and interest-bearing liabilities or (ii) changes in the interest rates of these assets and liabilities. The table also presents the change in adjusted net interest income between periods.

(1) The changes for each category of interest income and interest expense are divided between the portion of change attributable to the variance in volume and the portion of change attributable to the variance in rate for that category. The amount attributable to the combined impact of volume and rate has been allocated to each category based on the proportionate absolute dollar amount of change for that category.

<sup>(2)</sup>For net accrued periodic derivative cash settlements, the variance due to average volume represents the change in derivative cash settlements resulting from the change in the average notional amount of derivative contracts outstanding. The variance due to average rate represents the change in derivative cash settlements resulting from the net difference between the average rate paid and the average rate received for interest rate swaps during the period.
<sup>(3)</sup>See "Non-GAAP Financial Measures" for additional information on our adjusted non-GAAP measures.

Net interest income of \$73 million for the current quarter decreased by \$9 million, or 11%, from the same prior-year quarter, driven by a decrease in net interest yield of 15% (21 basis points) to 1.19%, which was partially offset by an increase in average interest-earning assets of 6%. Net interest income of \$222 million for the nine months ended February 28, 2017 decreased by \$30 million, or 12%, from the same prior-year period, driven by a decrease in net interest yield of 17% (25 basis points) to 1.22%, which was partially offset by an increase in average interest-earning assets of 7%.

- Average Interest-Earning Assets: The increase in average interest-earning assets for the current quarter and nine months ended February 28, 2017 was primarily attributable to growth in average total loans of \$1,202 million, or 5% and \$1,424 million, or 6%, respectively, over the same prior-year periods, as members refinanced with us loans made by other lenders and obtained advances to fund capital investments.
- *Net Interest Yield:* The decrease in the net interest yield for the current quarter and nine months ended February 28, 2017 reflects the combined impact of a decline in the average yield on interest-earning assets and an increase in our average cost of funds. The average yield on interest-earning assets declined by 11 basis points and 17 basis points during the current quarter and nine months ended February 28, 2017, respectively, to 4.22% and 4.23%, respectively. The decrease resulted from repayments on existing long-term loans with higher weighted-average fixed rates than the weighted-average fixed rates on new long-term loan advances, coupled with the repricing of higher-rate loans to lower fixed rates. Our average cost of funds increased by 12 basis points and 10 basis points, respectively, during the current quarter and nine months ended February 28, 2017 to 3.20% and 3.18%, respectively. This increase was largely attributable to a shift in our funding mix resulting from the replacement of a portion of our variable-rate debt with higher cost, longer-term debt to fund the growth in our loan portfolio and manage our refinancing risk.

Adjusted net interest income of \$54 million for the current quarter decreased by \$6 million, or 10%, from the same prioryear quarter, driven by a decrease in the adjusted net interest yield of 15% (15 basis points) to 0.87%, which was partially offset by the increase in average interest-earning assets of 6%. Adjusted net interest income of \$158 million for the nine months ended February 28, 2017 decreased by \$29 million, or 15%, from the same prior-year period, driven by a decrease in the adjusted net interest yield of 21% (23 basis points) to 0.86%, which was partially offset by the increase in average interest-earning assets of 7%.

The decreases in the adjusted net interest yield in the current quarter and nine months ended February 28, 2017 from the same prior-year periods were attributable to the combined impact of the decline in the average yield on interest-earning assets and an increase in our adjusted average cost of funds.

Our adjusted net interest income and adjusted net interest yield include the impact of net accrued periodic derivative cash settlements during the period. We recorded net periodic derivative cash settlement expense of \$19 million and \$23 million for the three months ended February 28, 2017 and February 29, 2016, respectively, and \$64 million and \$65 million for the nine months ended February 28, 2017 and February 29, 2016, respectively. See "Non-GAAP Financial Measures" for additional information on our adjusted measures.

#### **Provision for Loan Losses**

Our provision for loan losses in each period is primarily driven by the level of allowance that we determine is necessary for probable incurred loan losses inherent in our loan portfolio as of each balance sheet date.

We recorded a provision for loan losses of \$2 million for the three months ended February 28, 2017, compared with a benefit for loan losses of \$2 million for the same prior-year period. We recorded a provision for loan losses of \$5 million and \$4 million for the nine months ended February 28, 2017 and February 29, 2016, respectively.

The unfavorable shift in the provision for loan losses of \$4 million between the current quarter and the same prior-year quarter was primarily attributable to the increase in total loans outstanding, coupled with a slight deterioration in the credit quality of certain loans collectively evaluated for impairment during the current quarter. The increase in the provision for loan losses of \$1 million for the nine months ended February 28, 2017 from the same prior year period was primarily due to the increase in the balance of total loans outstanding, which was partially offset by a decrease in the reserve for individually impaired loans.

We provide additional information on our allowance for loan losses under "Credit Risk—Allowance for Loan Losses" and "Note 4—Loans and Commitments" of this Report. For information on our allowance methodology, see "MD&A—Critical Accounting Policies and Estimates" and "Note 1—Summary of Significant Accounting Policies" in our 2016 Form 10-K.

#### **Non-Interest Income**

Non-interest income consists of fee and other income, gains and losses on derivatives not accounted for in hedge accounting relationships and results of operations of foreclosed assets.

We recorded non-interest income gains of \$48 million and \$209 million for the three and nine months ended February 28, 2017, respectively. In comparison, we recorded non-interest income losses of \$236 million and \$337 million for the three and nine months ended February 29, 2016, respectively. The significant variance in non-interest income for the three and nine months ended February 28, 2017 from the same prior-year periods were primarily attributable to changes in net derivative gains (losses) recognized in our consolidated statements of operations.

#### Derivative Gains (Losses)

Our derivative instruments are an integral part of our interest rate risk management strategy. Our principal purpose in using derivatives is to manage our aggregate interest rate risk profile within prescribed risk parameters. The derivative instruments we use primarily include interest rate swaps, which we typically hold to maturity. The primary factors affecting the fair value of our derivatives and derivative gains (losses) recorded in our results of operations include changes in interest rates, the shape of the yield curve and the composition of our derivative portfolio. We generally do not designate our interest rate swaps, which currently account for all of our derivatives, for hedge accounting. Accordingly, changes in the fair value of interest rate swaps are reported in our consolidated statements of operations under derivative gains (losses). We did not have any derivatives designated as accounting hedges as of February 28, 2017 or May 31, 2016.

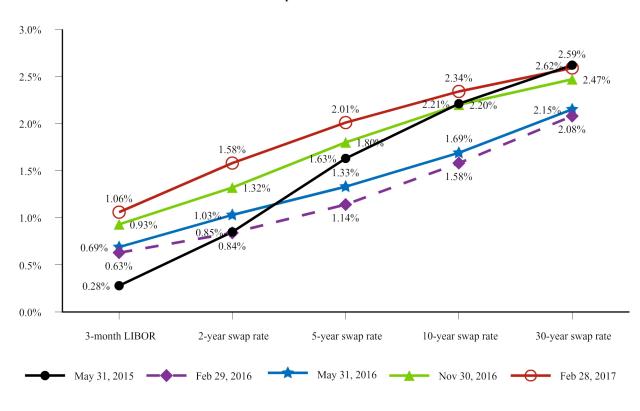

We currently use two types of interest rate swap agreements: (i) we pay a fixed rate and receive a variable rate ("pay-fixed swaps") and (ii) we pay a variable rate and receive a fixed rate ("receive-fixed swaps"). The benchmark rate for the substantial majority of the floating rate payments under our swap agreements is the London Interbank Offered Rate ("LIBOR"). Table 4 displays the average notional amount outstanding, by swap agreement type, and the weighted-average interest rate paid and received for derivative cash settlements during the three and nine months ended February 28, 2017 and February 29, 2016. As indicated in Table 4, our derivative portfolio currently consists of a higher proportion of pay-fixed swaps than receive-fixed swaps. The profile of our derivative portfolio may change as a result of changes in market conditions and actions taken to manage our interest rate risk.

			Three Mor	nths Ended

Pay-fixed swaps	\$ 6,389,187	2.89%	0.97%	\$ 6,476,600	3.00%	0.54%				
Receive-fixed swaps	4,220,667	1.40	2.68	3,601,198	0.94	2.93				
Total	\$10,609,854	2.29%	1.65%	\$10,077,798	2.25%	1.41%				
	F	ebruary 28, 2017		nths Ended February 29, 2016						
(Dollars in thousands)	Average Notional Balance	Weighted- Average Rate Paid	Weighted- Average Rate Received	Average Notional Balance	Weighted- Average Rate Paid	Weighted- Average Rate Received				
Pay-fixed swaps	\$ 6,673,175	2.91%	0.82%	\$ 6,202,082	3.06%	0.39%				
Receive-fixed swaps	3,858,890	1.24	2.75	3,728,197	0.85	3.01				
Total	\$10,532,065	2.29%	1.53%	\$ 9,930,279	2.22%	1.38%				

#### Table 4: Derivative Average Notional Amounts and Average Interest Rates

The average remaining maturity of our pay-fixed and receive-fixed swaps was 19 years and four years, respectively, as of February 28, 2017. In comparison, the average remaining maturity of our pay-fixed and receive-fixed swaps was 18 years and three years, respectively, as of February 29, 2016.

Pay-fixed swaps generally decrease in value as interest rates decline and increase in value as interest rates rise. In contrast, receive-fixed swaps generally increase in value as interest rates decline and decrease in value as interest rates rise. Because our pay-fixed and receive-fixed swaps are referenced to different maturity terms along the swap yield curve, different changes in the swap yield curve— parallel, flattening or steepening—will result in differences in the fair value of our derivatives. The chart below provides comparative swap yield curves as of the end of February 28, 2017, November 30, 2016, May 31, 2016, February 29, 2016 and May 31, 2015.

**Comparative Yield Curves** 

Benchmark rates obtained from Bloomberg.

Table 5 presents the components of net derivative gains (losses) recorded in our condensed consolidated results of operations for the three and nine months ended February 28, 2017 and February 29, 2016. Derivative cash settlements represent the net interest amount accrued during the reporting period for interest-rate swap payments. The derivative forward value represents the change in fair value of our interest rate swaps during the reporting period due to changes in expected future interest rates over the remaining life of our derivative contracts.

#### Table 5: Derivative Gains (Losses)

		Three Mor	ths	Ended	Nine Months Ended					
(Dollars in thousands)	Fe	bruary 28, 2017	F	ebruary 29, 2016	Fe	bruary 28, 2017	F	ebruary 29, 2016		
Derivative gains (losses) attributable to:										
Derivative cash settlements	\$	(19,354)	\$	(22,556)	\$	(64,331)	\$	(65,285)		
Derivative forward value gains (losses)		61,809		(220,480)		259,153		(290,952)		
Derivative gains (losses)	\$	42,455	\$	(243,036)	\$	194,822	\$	(356,237)		

The derivative gains of \$42 million and \$195 million recorded for the three and nine months ended February 28, 2017, respectively, were primarily attributable to a net increase in the fair value of our swaps due to an overall increase in interest rates, as depicted in the February 28, 2017 swap yield curve presented in the above chart.

The derivative losses of \$243 million and \$356 million recorded for the three and nine months ended February 29, 2016, respectively, were primarily attributable to a net decrease in the fair value of our swaps due to a flattening of the swap yield curve resulting from an increase in short-term interest rates and a decline in long-term interest rates.

See "Note 9—Derivative Instruments and Hedging Activities" for additional information on our derivative instruments.

#### **Results of Operations of Foreclosed Assets**

Results of operations of foreclosed assets consist of the operating results of entities controlled by CFC that hold foreclosed assets, impairment charges related to those entities and gains or losses related to the disposition of the entities.

As discussed above in "Executive Summary," on July 1, 2016, the sale of CAH was completed. As a result, we did not carry any foreclosed assets on our consolidated balance sheet as of February 28, 2017. Our net proceeds at closing totaled \$109 million, which represents the purchase price of \$144 million less agreed-upon purchase price adjustments as of the closing date.

We recorded expense of less than \$1 million for the current quarter and expense of \$2 million for the nine months ended February 28, 2017 related to CAH. These amounts include the combined impact of adjustments recorded at the closing date of the sale of CAH, post-closing purchase price adjustments and certain legal costs incurred pertaining to CAH.

We recorded gains related to CAH of \$1 million and \$2 million for the three and nine months ended February 29, 2016, respectively. The gains recorded during the three and nine months ended February 29, 2016 were attributable to CAH valuation adjustments.

See "Note 5-Foreclosed Assets" in our 2016 Form 10-K for additional information on the sale of CAH.

#### **Non-Interest Expense**

Non-interest expense consists of salaries and employee benefit expense, general and administrative expenses, losses on early extinguishment of debt and other miscellaneous expenses.

We recorded non-interest expense of \$21 million and \$23 million for the three months ended February 28, 2017 and February 29, 2016, respectively, and \$63 million and \$67 million for the nine months ended February 28, 2017 and February 29, 2016, respectively. The decreases in non-interest expense of \$2 million and \$4 million for the three and nine months ended February 28, 2017, respectively, were primarily attributable to a reduction in other general and administrative expenses during the respective periods.

#### Net Income (Loss) Attributable to Noncontrolling Interests

Net income (loss) attributable to noncontrolling interests represents 100% of the results of operations of RTFC and NCSC, as the members of RTFC and NCSC own or control 100% of the interest in their respective companies. The fluctuations in net income (loss) attributable to noncontrolling interests are primarily due to fluctuations in the fair value of NCSC's derivative instruments.

We recorded net income attributable to noncontrolling interests of less than \$1 million during the three months ended February 28, 2017 and \$2 million during the nine months ended February 28, 2017. In comparison, we recorded net losses attributable to noncontrolling interests of \$1 million and \$2 million for the three and nine months ended February 29, 2016, respectively. The variance in the results of operations of noncontrolling interests was due to fluctuations in the fair value of NCSC's derivative instruments.

#### CONSOLIDATED BALANCE SHEET ANALYSIS

Total assets of \$25,610 million as of February 28, 2017 increased by \$1,339 million, or 6%, from May 31, 2016, primarily due to growth in our loan portfolio. Total liabilities of \$24,462 million as of February 28, 2017 increased by \$1,009 million, or 4%, from May 31, 2016, primarily due to debt issuances to fund our loan portfolio growth. Total equity increased by \$330 million to \$1,147 million as of February 28, 2017. The increase in total equity for the nine months ended February 28, 2017 was primarily attributable to our reported net income of \$361 million, which was partially offset by patronage capital retirements totaling \$43 million.

Following is a discussion of changes in the major components of our assets and liabilities during the nine months ended February 28, 2017.

#### **Loan Portfolio**

We offer long-term fixed- and variable-rate loans and line of credit variable-rate loans. Under our long-term facilities, borrowers have the option of choosing a fixed or variable interest rate for periods of one to 35 years.

#### Loans Outstanding

Loans outstanding consist of advances from either new approved loans or from the unadvanced portion of loans previously approved. Table 6 summarizes total loans outstanding, by type and by member class, as of February 28, 2017 and May 31, 2016.

#### Table 6: Loans Outstanding by Type and Member Class

	February 28	8, 2017	May 31, 1	2016		Increase/
(Dollars in thousands)	Amount	% of Total	Amount	% of Total	(	Decrease)
Loans by type: <sup>(1)</sup>						
Long-term loans:						
Long-term fixed-rate loans	\$ 22,066,751	91%	\$ 21,390,576	93%	\$	676,175
Long-term variable-rate loans	925,267	4	757,500	3		167,767
Total long-term loans <sup>(2)</sup>	 22,992,018	95	 22,148,076	96		843,942
Line of credit loans	1,258,152	5	1,004,441	4		253,711
Total loans outstanding <sup>(3)</sup>	\$ 24,250,170	100%	\$ 23,152,517	100%	\$	1,097,653
Loans by member class: <sup>(1)</sup> CFC:						
Distribution	\$ 18,690,627	77%	\$ 17,674,335	76%	\$	1,016,292
Power supply	4,522,551	19	4,401,185	20		121,366
Statewide and associate	 56,597		 54,353			2,244
CFC total <sup>(2)</sup>	 23,269,775	96	 22,129,873	96		1,139,902
RTFC	363,006	1	341,842	1		21,164
NCSC	 617,389	3	 680,802	3		(63,413)
Total loans outstanding <sup>(3)</sup>	\$ 24,250,170	100%	\$ 23,152,517	100%	\$	1,097,653

<sup>(1)</sup> Includes TDR loans.

<sup>(2)</sup> Includes long-term loans guaranteed by RUS totaling \$169 million and \$174 million as of February 28, 2017 and May 31, 2016, respectively, and long-term loans covered under the Farmer Mac standby purchase commitment agreement totaling \$852 million and \$926 million as of February 28, 2017 and May 31, 2016, respectively.

<sup>(3)</sup> Total loans outstanding represents the outstanding unpaid principal balance of loans. Unamortized deferred loan origination costs, which totaled \$11 million and \$10 million as of February 28, 2017 and May 31, 2016, respectively, are excluded from total loans outstanding. These costs, however, are included in loans to members reported on the condensed consolidated balance sheets.

Total loans outstanding of \$24,250 million as of February 28, 2017 increased by \$1,098 million, or 5%, from May 31, 2016. The increase was primarily due to increases in CFC distribution and power supply loans of \$1,016 million and \$121 million, respectively, which were largely attributable to member advances for capital investments and members refinancing with us loans made by other lenders.

We provide additional information on our loan product types in "Item 1. Business—Loan Programs" and "Note 4—Loans and Commitments" in our 2016 Form 10-K. See "Debt—Secured Borrowings" below for information on encumbered and unencumbered loans and "Credit Risk Management" for information on the credit risk profile of our loan portfolio.

#### Loan Retention Rate

Table 7 presents a comparison between the historical retention rate of CFC's long-term fixed-rate loans that repriced during the nine months ended February 28, 2017 and loans that repriced during fiscal year 2016, and provides information on the percentage of borrowers that selected either another fixed-rate term or a variable rate. The retention rate is calculated based on the election made by the borrower at the repricing date. As indicated in Table 7, the average retention rate of CFC's repriced loans has been 98% over the presented periods.

#### Table 7: Historical Retention Rate and Repricing Selection<sup>(1)</sup>

		Nine Montl February		Year Ended May 31, 2016			
(Dollars in thousands)		Amount	% of Total	Amount	% of Total		
Loans retained:

Loans repriced and sold by CFC		_	_	4,459	_		
Total loans retained by CFC		770,287	97	1,060,373	98		
Total loans repaid		21,728	3	17,956	2		
Total	\$	792,015	100%	\$ 1,078,329	100%		

<sup>(1)</sup>Does not include NCSC and RTFC loans.

#### Debt

We utilize both short-term and long-term borrowings as part of our funding strategy and asset/liability management. We seek to maintain diversified funding sources across products, programs and markets to manage funding concentrations and reduce our liquidity or debt roll-over risk. Our funding sources include a variety of secured and unsecured debt securities in a wide range of maturities to our members and affiliates and in the capital markets.

#### **Debt Outstanding**

Table 8 displays the composition, by product type, of our outstanding debt as of February 28, 2017 and May 31, 2016. Table 8 also displays the composition of our debt based on several additional selected attributes.

# Table 8: Total Debt Outstanding

(Dollars in thousands)	Fel	oruary 28, 2017		May 31, 2016	 Increase/ (Decrease)

Total		100%		100%	

(4) Consists of long-term debt, subordinated deferrable debt and total members' subordinated debt reported on the condensed consolidated balance sheets. Maturity classification is based on the original contractual maturity as of the date of issuance of the debt.

Our outstanding debt volume generally increases and decreases in response to member loan demand. As outstanding loan balances increased during the nine months ended February 28, 2017, our debt volume also increased. Total debt outstanding was \$23,805 million as of February 28, 2017, an increase of \$1,207 million, or 5%, from May 31, 2016. The increase was primarily attributable to a net increase in commercial paper outstanding of \$476 million, a net increase in notes payable under the note purchase agreements with Farmer Mac of \$321 million, a net increase in notes payable under the Guaranteed Underwriter Program of \$221 million, a net increase in collateral trust bonds of \$153 million and a net increase in medium-term notes of \$85 million. Significant financing-related developments during the nine months ended February 28, 2017 are summarized below.

- On August 30, 2016, we received an advance of \$100 million, with a 20-year final maturity, under the Guaranteed Underwriter Program.
- On November 1, 2016, we issued \$300 million aggregate principal amount of 1.50% dealer medium-term notes due 2019, as part of our strategy in managing and reducing the refinancing risk associated with the near-term maturity of long-term debt in the fourth quarter of fiscal year 2017.
- On November 18, 2016, we amended and restated the three-year and five-year committed bank revolving line of credit agreements to extend the maturity dates to November 19, 2019 and November 19, 2021, respectively, and to terminate certain third-party bank commitments. See "Note 6—Short-Term Borrowings" for additional information.
- On December 1, 2016, we closed a \$375 million Series L committed loan facility from the Federal Financing Bank guaranteed by RUS pursuant to the Guaranteed Underwriter Program.
- On February 7, 2017, we issued \$450 million aggregate principal amount of 2.95% collateral trust bonds due 2024.
- On February 22, 2017, we received an advance of \$150 million at an effective rate of 3.012%, including a guarantee and user fee, with a 20-year final maturity, under the Guaranteed Underwriter Program.
- On February 22, 2017, we received an advance of \$250 million under the \$4,500 million revolving note purchase agreement with Farmer Mac and received an additional \$100 million under the \$300 million committed revolving note purchase agreement with Farmer Mac.

#### Member Investments

Debt securities issued to our members represent an important, stable source of funding. Table 9 displays outstanding member debt, by debt product type, as of February 28, 2017 and May 31, 2016.

<sup>&</sup>lt;sup>(1)</sup> Includes variable-rate debt that has been swapped to a fixed rate net of any fixed-rate debt that has been swapped to a variable rate.

<sup>(2)</sup> Includes fixed-rate debt that has been swapped to a variable rate net of any variable-rate debt that has been swapped to a fixed rate. Also includes commercial paper notes, which generally have maturities of less than 90 days. The interest rate on commercial paper notes does not change once the note has been issued; however, the rates on new commercial paper notes change daily.

<sup>(3)</sup> Borrowings with an original contractual maturity of one year or less are classified as short-term borrowings. Borrowings with an original contractual maturity of greater than one year are classified as long-term debt.

#### **Table 9: Member Investments**

	February	28, 2017	May 31				
(Dollars in thousands)	Amount	% of Total <sup>(1)</sup>	Amount	% of Total <sup>(1)</sup>	Increase/ (Decrease)		
Commercial paper	\$ 944,111	48%	\$ 848,007	56%	\$	96,104	
Select notes	711,455	100	701,849	100		9,606	
Daily liquidity fund notes	494,752	100	525,959	100		(31,207)	
Medium-term notes	613,363	18	654,058	20		(40,695)	
Members' subordinated certificates	1,420,608	100	1,443,810	100		(23,202)	
Total	\$ 4,184,289		\$ 4,173,683		\$	10,606	
Percentage of total debt outstanding	18%		18%				

<sup>(1)</sup> Represents the percentage of each line item outstanding to our members.

Member investments accounted for 18% of total debt outstanding as of both February 28, 2017 and May 31, 2016. Over the last three years, outstanding member investments have averaged \$4,181 million.

#### Short-Term Borrowings

Short-term borrowings consist of borrowings with an original contractual maturity of one year or less and do not include the current portion of long-term debt. Short-term borrowings totaled \$3,388 million and accounted for 14% of total debt outstanding as of February 28, 2017, compared with \$2,939 million, or 13%, of total debt outstanding as of May 31, 2016. See Table 22 under "Liquidity Risk" for the composition of our short-term borrowings.

#### Long-Term and Subordinated Debt

Long-term debt, defined as debt with an original contractual maturity term of greater than one year, primarily consists of medium-term notes, collateral trust bonds, notes payable under the Guaranteed Underwriter Program and notes payable under our note purchase agreement with Farmer Mac. Subordinated debt consists of subordinated deferrable debt and members' subordinated certificates. Our subordinated deferrable debt and members' subordinated certificates have original contractual maturity terms of greater than one year. Long-term and subordinated debt totaled \$20,417 million and accounted for 86% of total debt outstanding as of February 28, 2017, compared with \$19,659 million, or 87%, of total debt outstanding as of May 31, 2016. As discussed above, the increase in total debt outstanding, including long-term and subordinated debt, was primarily due to the issuance of debt to fund loan portfolio growth.

#### **Collateral Pledged**

We are required to pledge loans or other collateral in borrowing transactions under our collateral trust bond indentures, note purchase agreements with Farmer Mac and bond agreements under the Guaranteed Underwriter Program. We are required to maintain pledged collateral equal to at least 100% of the outstanding amount of borrowings. However, we typically maintain pledged collateral in excess of the required percentage to ensure that required collateral levels are maintained and to facilitate the timely execution of debt issuances by reducing or eliminating the lead time to pledge additional collateral. Under the provisions of our committed bank revolving line of credit agreements, the excess collateral that we are allowed to pledge cannot exceed 150% of the outstanding borrowings under our collateral trust bond indentures, Farmer Mac note purchase or the Guaranteed Underwriter Program. In certain cases, provided that all conditions of eligibility under the different programs are satisfied, we may withdraw excess pledged collateral or transfer collateral from one borrowing program to another to facilitate a new debt issuance.

Of our total debt outstanding of \$23,805 million as of February 28, 2017, \$15,041 million, or 63%, was secured by pledged loans. In comparison, of our total debt outstanding of \$22,598 million as of May 31, 2016, \$14,348 million, or 63%, was secured by pledged loans. Table 10 displays the unpaid principal balance of loans pledged for secured debt, the excess collateral pledged and unencumbered loans as of February 28, 2017 and May 31, 2016.

#### Table 10: Unencumbered Loans

(Dollars in thousands)	F	ebruary 28, 2017	May 31, 2016		
Total loans outstanding <sup>(1)</sup>	\$	24,250,170	\$	23,152,517	
Less: Total secured debt <sup>(2)</sup>		(15,328,037)		(14,643,108)	
Excess collateral pledged <sup>(3)</sup>		(2,171,281)		(1,673,404)	
Unencumbered loans	\$	6,750,852	\$	6,836,005	
Unencumbered loans as a percentage of total loans		28%		30%	

<sup>(1)</sup> Excludes unamortized deferred loan origination costs of \$11 million and \$10 million as of February 28, 2017 and May 31, 2016, respectively.

<sup>(2)</sup> Represents debt face value, excluding unamortized debt discounts and debt issuance costs.

<sup>(3)</sup> Excludes cash collateral pledged to secure debt. If there is an event of default under most of our indentures, we can only withdraw the excess collateral if we substitute cash or permitted investments of equal value.

Table 11 displays the collateral coverage ratios as of February 28, 2017 and May 31, 2016 for the debt agreements noted above that require us to pledge collateral.

#### Table 11: Collateral Pledged

	Require	ment/Limit		
		Committed Bank Revolving Line of	Actua	1
Debt Agreement	Debt Indenture Minimum	Credit Agreements Maximum	February 28, 2017	May 31, 2016
Collateral trust bonds 1994 indenture	100%	150%	116%	121%
Collateral trust bonds 2007 indenture	100	150	111	110
Guaranteed Underwriter Program notes payable <sup>(1)</sup> .	100	150	118	110
Farmer Mac notes payable	100	150	113	117
Clean Renewable Energy Bonds Series 2009A	100	150	118	115

(1) Represents notes payable under the Guaranteed Underwriter Program, which supports the Rural Economic Development Loan and Grant program. The Federal Financing Bank provides the financing for these notes, and RUS provides a guarantee of repayment. We are required to pledge collateral in an amount at least equal to the outstanding principal amount of the notes payable.

We provide additional information on our borrowings, including the maturity profile, below in "Liquidity Risk." We provide a more detailed description of each of our debt product types in "Note 6—Short-Term Borrowings," "Note 7—Long-Term Debt," "Note 8—Subordinated Deferrable Debt" and "Note 9—Members' Subordinated Certificates" in our 2016 Form 10-K. Refer to "Note 4—Loans and Commitments—Pledging of Loans" for additional information related to pledged collateral.

#### Equity

Total equity increased by \$330 million during the nine months ended February 28, 2017 to \$1,147 million, primarily attributable to our net income of \$361 million for the period, which was partially offset by patronage capital retirements totaling \$43 million.

In July 2016, the CFC Board of Directors authorized the allocation of fiscal year 2016 adjusted net income as follows: \$1 million to the Cooperative Educational Fund, \$86 million to the members' capital reserve and \$84 million to members in the form of patronage capital. The amount of patronage capital allocated each year by CFC's Board of Directors is based on adjusted non-GAAP net income, which excludes the impact of derivative forward value gains (losses). See "Non-GAAP Financial Measures" for information on adjusted net income.

In July 2016, the CFC Board of Directors also authorized the retirement of patronage capital totaling \$42 million, which represented 50% of the fiscal year 2016 allocation. This amount was returned to members in cash in September 2016. The

remaining portion of the allocated amount will be retained by CFC for 25 years under guidelines adopted by the CFC Board of Directors in June 2009.

The CFC Board of Directors is required to make annual allocations of net earnings, if any. CFC has made annual retirements of allocated net earnings in 36 of the last 37 fiscal years; however, future retirements of allocated amounts are determined based on CFC's financial condition. The CFC Board of Directors has the authority to change the current practice for allocating and retiring net earnings at any time, subject to applicable laws. See "Item 1. Business-Allocation and Retirement of Patronage Capital" of our 2016 Form 10-K for additional information.

#### **OFF-BALANCE SHEET ARRANGEMENTS**

In the ordinary course of business, we engage in financial transactions that are not presented on our condensed consolidated balance sheets, or may be recorded on our condensed consolidated balance sheets in amounts that are different from the full contract or notional amount of the transaction. Our off-balance sheet arrangements consist primarily of guarantees of member obligations and unadvanced loan commitments intended to meet the financial needs of our members.

#### Guarantees

We provide guarantees for certain contractual obligations of our members to assist them in obtaining various forms of financing. We use the same credit policies and monitoring procedures in providing guarantees as we do for loans and commitments. If a member defaults on its obligation, we are obligated to pay required amounts pursuant to our guarantees. Meeting our guarantee obligations satisfies the underlying obligation of our member systems and prevents the exercise of remedies by the guarantee beneficiary based upon a payment default by a member. In general, the member is required to repay any amount advanced by us with accrued interest, pursuant to the documents evidencing the member's reimbursement obligation. Table 12 displays our guarantees outstanding, by guarantee type and by company, as of February 28, 2017 and May 31, 2016.

#### **Table 12: Guarantees Outstanding**

We recorded a guarantee liability of \$16 million and \$17 million as of February 28, 2017 and May 31, 2016, respectively, related to the contingent and noncontingent exposures for guarantee and liquidity obligations associated with our members' debt. Of our total guarantee amounts, 67% and 66% as of February 28, 2017 and May 31, 2016, respectively, were secured by a mortgage lien on substantially all of the system's assets and future revenue of the borrowers.

We had outstanding letters of credit for the benefit of our members totaling \$304 million as of February 28, 2017. Of this amount, \$228 million was related to obligations for which we may be required to advance funds based on various trigger events specified in the letters of credit agreements. If we are required to advance funds, the member is obligated to repay the advance amount, and accrued interest, to us. The remaining \$76 million of letters of credit are intended to provide liquidity for pollution control bonds.

In addition to the letters of credit presented in Table 12, we had master letter of credit facilities in place as of February 28, 2017, under which we may be required to issue up to an additional \$64 million in letters of credit to third parties for the benefit of our members. All of our master letter of credit facilities as of February 28, 2017 were subject to material adverse change clauses at the time of issuance. Prior to issuing a letter of credit under these facilities, we confirm that there has been no material adverse change in the business or condition, financial or otherwise, of the borrower since the time the loan was approved and that the borrower is currently in compliance with the letter of credit terms and conditions.

In addition to the guarantees described in Table 12, we were the liquidity provider for long-term variable-rate, tax-exempt bonds issued for our member cooperatives totaling \$477 million as of February 28, 2017. As liquidity provider on these tax-exempt bonds, we may be required to purchase bonds that are tendered or put by investors. Investors provide notice to the remarketing agent that they will tender or put a certain amount of bonds at the next interest rate reset date. If the remarketing agent is unable to sell such bonds to other investors by the next interest rate reset date, we have unconditionally agreed to purchase such bonds. Our obligation as liquidity provider is in the form of a letter of credit on \$76 million of the tax-exempt bonds, which is discussed above and included in Table 12 as a component of the letters of credit amount of \$304 million as of February 28, 2017. We were not required to perform as liquidity provider pursuant to these obligations during the nine months ended February 28, 2017. For the other \$401 million of these long-term variable-rate, tax-exempt bonds, we also provide a guarantee of payment of principal and interest, which is included in Table 12, as a component of long-term tax-exempt bonds of \$469 million as of February 28, 2017.

Table 13 presents the maturities for each of the next five fiscal years and thereafter of the notional amount of our outstanding guarantee obligations as of February 28, 2017.

		Dutatonding	Maturities of Guaranteed Obligations								
(Dollars in thousands)	Outstanding Balance		2017	2018	2019	2020	2021	Thereafter			
Guarantees	\$	887,484	\$ 118,902	\$237,217	\$ 17,901	\$ 57,808	\$112,794	\$	342,862		

We provide additional information about our guarantee obligations in "Note 11-Guarantees."

#### **Unadvanced Loan Commitments**

Unadvanced loan commitments represent approved and executed loan contracts for which funds have not been advanced to borrowers. The table below displays the amount of unadvanced loan commitments, which consist of line of credit and long-term loan commitments, as of February 28, 2017 and May 31, 2016. Our line of credit commitments include both contracts that are subject to material adverse change clauses and contracts that are not subject to material adverse change clauses.

#### Table 14: Unadvanced Loan Commitments

		February 2	8, 2017	May 31,	2016	Increase/	
(Dollars in thousands)		Amount	% of Total	Amount	% of Total	(Decrease)	
Line of credit commitments:							
Conditional <sup>(1)</sup>	\$	5,498,446	44%	\$ 6,248,546	47%	\$	(750,100)
Unconditional <sup>(2)</sup>		2,655,038	21	2,447,902	19		207,136
Total line of credit unadvanced commitments		8,153,484	65	8,696,448	66		(542,964)
Total long-term loan unadvanced commitments <sup>(1)</sup>		4,314,490	35	4,508,562	34		(194,072)
Total unadvanced loan commitments	\$	12,467,974	100%	\$13,205,010	100%	\$	(737,036)

<sup>(1)</sup>Represents amount related to facilities that are subject to material adverse change clauses.

<sup>(2)</sup>Represents amount related to facilities that are not subject to material adverse change clauses.

Unadvanced line of credit commitments are typically revolving facilities for periods not to exceed five years. Historically, borrowers have not drawn the full commitment amount for line of credit facilities, and we have experienced a very low

utilization rate on line of credit loan facilities, regardless of whether or not a material adverse change clause exists at the time of advance. We believe this borrowing pattern is likely to continue because electric cooperatives generate a significant amount of cash from the collection of revenue from their customers and therefore generally do not need to draw down on line of credit commitments to supplement operating cash flow. In addition, the majority of the unadvanced line of credit commitments serve as supplemental back-up liquidity to our borrowers. See "MD&A—Off-Balance Sheet Arrangements" in our 2016 Form 10-K for additional information.

Table 15 presents the amount of unadvanced loan commitments, by loan type, as of February 28, 2017 and the maturities of the commitment amounts for each of the next five fiscal years and thereafter.

	Available	 Notional Maturities of Unadvanced Loan Commitments									
(Dollars in thousands)	Balance	2017	2018		2019		2020		2021		Thereafter
Line of credit	\$ 8,153,484	\$ 85,665	\$4,855,109	\$	905,597	\$	784,867	\$	689,926	\$	832,320
Long-term loans	4,314,490	25,120	563,126		870,387		709,467		786,966		1,359,424
Total	\$12,467,974	\$ 110,785	\$ 5,418,235	<b>\$</b> 1	1,775,984	<b>\$</b> 1	1,494,334	\$1	,476,892	\$	2,191,744

#### Table 15: Notional Maturities of Unadvanced Loan Commitments

Based on our historical experience, we expect that the majority of the unadvanced loan commitments will expire without being fully drawn upon. Accordingly, the total unadvanced loan commitment amount of \$12,468 million as of February 28, 2017 is not necessarily representative of future cash funding requirements.

#### Unadvanced Loan Commitments—Conditional

The substantial majority of our line of credit commitments and all of our unadvanced long-term loan commitments include material adverse change clauses. Unadvanced loan commitments subject to material adverse change clauses totaled \$9,813 million and \$10,757 million as of February 28, 2017 and May 31, 2016, respectively, and accounted for 79% and 81% of the combined total of unadvanced line of credit and long-term loan commitments as of February 28, 2017 and May 31, 2016, respectively. Prior to making advances on these facilities, we confirm that there has been no material adverse change in the borrower's business or condition, financial or otherwise, since the time the loan was approved and confirm that the borrower is currently in compliance with loan terms and conditions. In some cases, the borrower's access to the full amount of the facility is further constrained by use of proceeds restrictions, imposition of borrower-specific restrictions, or by additional conditions that must be met prior to advancing funds. Since we generally do not charge a fee for the borrower to have an unadvanced amount on a loan facility that is subject to a material adverse change clause, our borrowers tend to request amounts in excess of their immediate estimated loan requirements.

#### Unadvanced Loan Commitments—Unconditional

Unadvanced loan commitments not subject to material adverse change clauses at the time of each advance consisted of unadvanced committed lines of credit totaling \$2,655 million and \$2,448 million as of February 28, 2017 and May 31, 2016, respectively. For contracts not subject to a material adverse change clause, we are generally required to advance amounts on the committed facilities as long as the borrower is in compliance with the terms and conditions of the facility. We record a liability for credit losses on our consolidated balance sheets for unadvanced loan commitments related to facilities that are not subject to a material adverse change clause we do not consider these commitments to be conditional.

Loan syndications, where the pricing is set at a spread over a market index as agreed upon by all of the participating banks based on market conditions at the time of syndication, accounted for 80% of unconditional line of credit commitments as of February 28, 2017. The remaining 20% represented unconditional committed line of credit loans under which any new advance would be made at rates determined by us based on our cost, and we have the option to pass on to the borrower any cost increase related to the advance.

Table 16 presents the maturities for each of the next five fiscal years and thereafter of the notional amount of unconditional committed lines of credit not subject to a material adverse change clause as of February 28, 2017.

#### Table 16: Maturities of Notional Amount of Unconditional Committed Lines of Credit

# **RISK MANAGEMENT**

#### Overview

We face a variety of risks that can significantly affect our financial performance, liquidity, reputation and ability to meet the expectations of our members, investors and other stakeholders. As a financial services company, the major categories of risk exposures inherent in our business activities include credit risk, liquidity risk, market risk and operational risk. These risk categories are summarized below.

- *Credit risk* is the risk that a borrower or other counterparty will be unable to meet its obligations in accordance with agreed-upon terms.
- *Liquidity risk* is the risk that we will be unable to fund our operations and meet our contractual obligations or that we will be unable to fund new loans to borrowers at a reasonable cost and tenor in a timely manner.
- *Market risk* is the risk that changes in market variables, such as movements in interest rates, may adversely affect the match between the timing of the contractual maturities, re-pricing and prepayments of our financial assets and the related financial liabilities funding those assets.
- *Operational risk* is the risk of loss resulting from inadequate or failed internal controls, processes, systems, human error or external events. Operational risk also includes compliance risk, fiduciary risk, reputational risk and litigation risk.

Effective risk management is critical to our overall operations and in achieving our primary objective of providing costbased financial products to our rural electric members while maintaining the sound financial results required for investmentgrade credit ratings on our debt instruments. Accordingly, we have a risk management framework that is intended to govern the principal risks we face in conducting our business and the aggregate amount of risk we are willing to accept, referred to as risk appetite, in the context of CFC's mission and strategic objectives and initiatives. We provide information on our risk management framework in our 2016 Form 10-K under "Item 7. MD&A—Risk Management—Risk Management Framework."

# **CREDIT RISK**

Our loan portfolio, which represents the largest component of assets on our balance sheet, and guarantees account for the substantial majority of our credit risk exposure. We also engage in certain non-lending activities that may give rise to credit and counterparty settlement risk, including the purchase of investment securities and entering into derivative transactions to manage our interest rate risk.

#### Loan and Guarantee Portfolio Credit Risk

Below we provide information on the credit risk profile of our loan portfolio and guarantees, including security provisions, loan concentration, credit performance and our allowance for loan losses.

#### Security Provisions

Except when providing line of credit loans, we generally lend to our members on a senior secured basis. Long-term loans are generally secured on parity with other secured lenders (primarily RUS), if any, by all assets and revenue of the borrower with exceptions typical in utility mortgages. Line of credit loans are generally unsecured. In addition to the collateral

pledged to secure our loans, borrowers also are required to set rates charged to customers to achieve certain financial ratios. Of our total loans outstanding, 92% were secured and 8% were unsecured as of both February 28, 2017 and May 31, 2016. Table 17 presents, by loan type and by company, the amount and percentage of secured and unsecured loans in our loan portfolio.

# Table 17: Loan Portfolio Security Profile<sup>(1)</sup>

<sup>(1)</sup> Excludes deferred loan origination costs of \$11 million and \$10 million as of February 28, 2017 and May 31, 2016, respectively.

As part of our strategy in managing our credit risk exposure, we entered into a long-term standby purchase commitment agreement with Farmer Mac on August 31, 2015, as amended on May 31, 2016. Under this agreement, we may designate certain loans to be covered under the commitment, as approved by Farmer Mac, and in the event any such loan later goes into material default for at least 90 days, upon request by us, Farmer Mac must purchase such loan at par value. The outstanding principal balance of loans covered under this agreement totaled \$852 million as of February 28, 2017, compared with \$926 million as of May 31, 2016, and \$511 million as of February 29, 2016. No loans have been put to Farmer Mac for purchase pursuant to this agreement.

#### Loan Concentration

We serve electric and telecommunications members throughout the United States and its territories, including 49 states, the District of Columbia, American Samoa and Guam. The largest concentration of loans to borrowers in any one state represented approximately 15% of total loans outstanding as of both February 28, 2017 and May 31, 2016.

Table 18 displays the outstanding exposure of the 20 largest borrowers, by exposure type and by company, as of February 28, 2017 and May 31, 2016. The 20 largest borrowers consisted of 10 distribution systems and 10 power supply systems as of February 28, 2017. The 20 largest borrowers consisted of 11 distribution systems and nine power supply systems as of May 31, 2016. The largest total outstanding exposure to a single borrower or controlled group represented approximately 2% of total loans and guarantees outstanding as of both February 28, 2017 and May 31, 2016.

	February 28, 2017		May 31, 2	2016

#### Table 18: Credit Exposure to 20 Largest Borrowers

#### **Credit Performance**

As part of our credit risk management process, we monitor and evaluate each borrower and loan in our loan portfolio and assign numeric internal risk ratings based on quantitative and qualitative assessments. Our ratings are intended to align with the federal banking regulatory credit risk rating definitions of pass and criticized categories, with criticized divided between special mention, substandard and doubtful. Internal risk ratings and payment status trends are indicators, among others, of the level of credit risk in our loan portfolio. As displayed in "Note 4—Loans and Commitments," 0.6% and 0.2% of the loans in our portfolio were classified as criticized as of February 28, 2017 and May 31, 2016, respectively. Below we provide information on certain additional credit quality indicators, including modified loans that are considered troubled debt restructurings ("TDRs") and nonperforming loans.

#### Troubled Debt Restructurings

We actively monitor problem loans and, from time to time, attempt to work with borrowers to manage such exposures through loan workouts or modifications that better align with the borrower's current ability to pay. A loan restructuring or modification of terms is accounted for as a TDR if, for economic or legal reasons related to the borrower's financial difficulties, a concession is granted to the borrower that we would not otherwise consider. TDR loans generally are initially placed on nonaccrual status, although in many cases such loans were already on nonaccrual status prior to modification. Interest accrued but not collected at the date a loan is placed on nonaccrual status is reversed against earnings. These loans may be returned to performing status and the accrual of interest resumed if the borrower performs under the modified terms for an extended period of time, and we expect the borrower to continue to perform in accordance with the modified terms. In

certain limited circumstances in which a TDR loan is current at the modification date, the loan may remain on accrual status at the time of modification.

We did not have any loans modified as TDRs during the nine months ended February 28, 2017. Table 19 presents the carrying value of loans modified as TDRs in prior periods as of February 28, 2017 and May 31, 2016. These loans were considered individually impaired as of the end of each period presented.

#### Table 19: TDR Loans

		Februar	y 28, 2017	May 31, 2016				
(Dollars in thousands)		Amount	% of Total Loans		Amount	% of Total Loans		
TDR loans:								
CFC	\$	6,581	0.02%	\$	6,716	0.03%		
RTFC		6,717	0.03		10,598	0.04		
Total TDR loans	\$	13,298	0.05%	\$	17,314	0.07%		
Performance status of TDR loans:								
Performing TDR loans	\$	13,298	0.05%	\$	13,808	0.06%		
Nonperforming TDR loans			—		3,506	0.01		
Total TDR loans	\$	13,298	0.05%	\$	17,314	0.07%		

As indicated in Table 19, we did not have any TDR loans classified as nonperforming as of February 28, 2017. We had TDR loans classified as nonperforming totaling \$4 million as of May 31, 2016.

TDR loans classified as performing totaled \$13 million and \$14 million as of February 28, 2017 and May 31, 2016, respectively. These loans were on accrual status as of the respective dates.

#### Nonperforming Loans

In addition to nonperforming TDR loans, we also may have nonperforming loans that have not been modified and classified as a TDR. We classify such loans as nonperforming at the earlier of the date when we determine: (i) interest or principal payments on the loan is past due 90 days or more; (ii) as a result of court proceedings, the collection of interest or principal payments based on the original contractual terms is not expected; or (iii) the full and timely collection of interest or principal is otherwise uncertain. Once a loan is classified as nonperforming, we generally place the loan on nonaccrual status. Interest accrued but not collected at the date a loan is placed on nonaccrual status is reversed against earnings. We had no other loans classified as nonperforming as of February 28, 2017 or May 31, 2016.

We provide additional information on the credit quality of our loan portfolio in "Note 4-Loans and Commitments."

#### Allowance for Loan Losses

The allowance for loan losses is determined based upon evaluation of the loan portfolio, past loss experience, specific problem loans, economic conditions and other pertinent factors that, in management's judgment, could affect the risk of loss in the loan portfolio. We review and adjust the allowance quarterly to cover estimated probable losses in the portfolio. All loans are written off in the period that it becomes evident that collectability is highly unlikely; however, our efforts to recover all charged-off amounts may continue. Management believes the allowance for loan losses is appropriate to cover estimated probable portfolio losses.

Table 20 summarizes changes in the allowance for loan losses for the three and nine months ended February 28, 2017 and February 29, 2016, and provides a comparison of the allowance by company as of February 28, 2017 and May 31, 2016.

#### Table 20: Allowance for Loan Losses

	Three Months Ended				Nine Months Ended				
(Dollars in thousands)		February 28, 2017		February 29, 2016		February 28, 2017		February 29, 2016	
Beginning balance	\$	33,911	\$	39,600	\$	33,258	\$	33,690	
Provision for loan losses		2,065		(1,735)		4,731		4,067	
Net recoveries (charge-offs)		53		53		(1,960)		161	
Ending balance	\$	36,029	\$	37,918	\$	36,029	\$	37,918	
					February 28, 2017		May 31, 2016		
Allowance for loan losses by company:									
CFC					\$	28,358	\$	24,559	
RTFC						4,222		5,565	
NCSC						3,449		3,134	
Total					\$	36,029	\$	33,258	
Allowance coverage ratios:									
Total loans outstanding					<b>\$</b> 2	4,250,170	\$2	3,152,517	
Percentage of total loans outstanding						0.15%		0.14%	
Percentage of total performing TDR loans outstanding.						270.94		240.86	
Percentage of total nonperforming TDR loans outstanding						_		948.60	
Percentage of loans on nonaccrual status						_		948.60	

The allowance for loan losses increased by \$3 million during the nine months ended February 28, 2017 to \$36 million. The allowance coverage ratio was 0.15% and 0.14% as of February 28, 2017 and May 31, 2016, respectively. The increase in the allowance for loan losses was primarily attributable to an increase in the collective allowance for loans not individually evaluated for impairment due to the increase in total loans outstanding, coupled with a slight deterioration in the credit quality of certain loans, which was partially offset by a decline in the specific reserve for loans individually evaluated for impairment. Loans designated as individually impaired loans totaled \$13 million and \$17 million as of February 28, 2017 and May 31, 2016, respectively, and the specific allowance related to these loans totaled \$1 million and \$3 million, respectively.

We discuss our methodology for determining the allowance for loan losses above in "MD&A—Critical Accounting Policies and Estimates" and in "Note 1—Summary of Significant Accounting Policies" in our 2016 Form 10-K. Also see "Results of Operations—Provision for Loan Losses" and "Note 4—Loans and Commitments" for additional information on our allowance for loan losses.

#### **Counterparty Credit Risk**

We are exposed to counterparty risk related to the performance of the parties with which we entered into financial transactions, primarily for derivative instruments and cash and time deposits that we have with various financial institutions. To mitigate this risk, we only enter into these transactions with financial institutions with investment-grade ratings. Our cash and time deposits with financial institutions generally have an original maturity of less than one year.

We manage our derivative counterparty credit risk by requiring that derivative counterparties participate in one of our committed bank revolving line of credit agreements, monitoring the overall credit worthiness of each counterparty, using counterparty specific credit risk limits, executing master netting arrangements and diversifying our derivative transactions among multiple counterparties. Our derivative counterparties had credit ratings ranging from Aa3 to Baa2 by Moody's Investors Service ("Moody's") and from AA- to BBB+ by Standard & Poor's Ratings Services ("S&P") as of

February 28, 2017. Our largest counterparty exposure, based on the outstanding notional amount, represented approximately 23% and 25% of the total outstanding notional amount of derivatives as of February 28, 2017 and May 31, 2016, respectively.

#### Credit Risk-Related Contingent Features

Our derivative contracts typically contain mutual early termination provisions, generally in the form of a credit rating trigger. Under the mutual credit rating trigger provisions, either counterparty may, but is not obligated to, terminate and settle the agreement if the credit rating of the other counterparty falls to a level specified in the agreement. If a derivative contract is terminated, the amount to be received or paid by us would be equal to the mark-to-market value, as defined in the agreement, as of the termination date.

Our senior unsecured credit ratings from Moody's and S&P were A2 and A, respectively, as of February 28, 2017. Both Moody's and S&P had our ratings on stable outlook as of February 28, 2017. Table 21 displays the notional amounts of our derivative contracts with rating triggers as of February 28, 2017, and the payments that would be required if the contracts were terminated as of that date because of a downgrade of our unsecured credit ratings or the counterparty's unsecured credit ratings below A3/A-, below Baa1/BBB+, to or below Baa2/BBB, below Baa3/BBB-, or to or below Ba2/BB+ by Moody's or S&P, respectively. In calculating the payment amounts that would be required upon termination of the derivative contracts, we assumed that the amounts for each counterparty would be netted in accordance with the provisions of the counterparty's master netting agreements. The net payment amounts are based on the fair value of the underlying derivative instrument, excluding the credit risk valuation adjustment, plus any unpaid accrued interest amounts.

(Dollars in thousands)	Notional Amount		Payable Due From CFC		Receivable Due to CFC		Net (Payable)/ Receivable	
Impact of rating downgrade trigger:								
Falls below A3/A- <sup>(1)</sup>	\$	59,165	\$	(14,246)	\$	—	\$	(14,246)
Falls below Baa1/BBB+		7,156,973		(163,243)		5,874		(157,369)
Falls to or below Baa2/BBB <sup>(2)</sup>		460,611		_		2,030		2,030
Falls below Baa3/BBB		370,585		(20,734)		_		(20,734)
Total	\$	8,047,334	\$	(198,223)	\$	7,904	\$	(190,319)

#### Table 21: Rating Triggers for Derivatives

<sup>(1)</sup> Rating trigger for CFC falls below A3/A-, while rating trigger for counterparty falls below Baa1/BBB+ by Moody's or S&P, respectively.

<sup>(2)</sup> Rating trigger for CFC falls to or below Baa2/BBB, while rating trigger for counterparty falls to or below Ba2/BB+ by Moody's or S&P, respectively.

The aggregate amount, excluding and including the credit risk valuation adjustment, of all derivatives with rating triggers that were in a net liability position was \$198 million and \$197 million, respectively, as of February 28, 2017. There were no counterparties that fell below the rating trigger levels in our interest swap contracts as of February 28, 2017. If a counterparty has a credit rating that falls below the rating trigger level specified in the interest swap contract, we have the option to terminate all derivatives with the counterparty. However, we generally do not terminate such agreements early because our interest rate swaps are critical to our matched funding strategy.

See "Item 1A. Risk Factors" in our 2016 Form 10-K for additional information about credit risk related to our business.

## LIQUIDITY RISK

Our liquidity risk management framework is designed to meet our liquidity objectives of providing a reliable source of funding to members, meet maturing debt and other obligations, issue new debt and fund our operations on a cost-effective basis under normal operating conditions as well as under CFC-specific and/or market stress conditions.

#### **Short-Term Borrowings**

We rely primarily on cash flows from our operations along with short-term borrowings, which we refer to as our short-term funding portfolio, as sources of funding to meet our near-term, day-to-day liquidity needs. Our short-term funding portfolio consists of commercial paper, which we offer to members and dealers, select notes and daily liquidity fund notes to members, bank-bid notes and medium-term notes to members and dealers. Table 22 displays the composition of our short-term borrowings as of February 28, 2017 and May 31, 2016.

#### **Table 22: Short-Term Borrowings**

	February	28, 2017	May 31, 2016			
(Dollars in thousands)	Amount Outstanding	% of Total Debt Outstanding	Amount Outstanding	% of Total Debt Outstanding		
Short-term borrowings:						
Commercial paper:						
Commercial paper sold through dealers, net of discounts	\$ 1,039,734	4%	\$ 659,935	3%		
Commercial paper sold directly to members, at par	944,111	4	848,007	4		
Total commercial paper	1,983,845	8	1,507,942	7		
Select notes	711,455	3	701,849	3		
Daily liquidity fund notes	494,752	2	525,959	2		
Medium-term notes sold to members	198,026	1	203,098	1		
Total short-term borrowings	\$ 3,388,078	14%	\$ 2,938,848	13%		

Our short-term borrowings totaled \$3,388 million and accounted for 14% of total debt outstanding as of February 28, 2017, compared with \$2,939 million, or 13%, of total debt outstanding as of May 31, 2016. Of the total outstanding commercial paper, \$1,040 million and \$660 million was issued to dealers as of February 28, 2017 and May 31, 2016, respectively. During fiscal year 2015, we began reducing the level of dealer commercial paper to an amount below \$1,250 million to manage our short-term wholesale funding risk. We expect to continue to maintain our outstanding dealer commercial paper at a level below this amount for the foreseeable future.

#### **Liquidity Reserve**

As part of our strategy in meeting our liquidity objectives, we seek to maintain a liquidity reserve in the form of both onbalance sheet and off-balance sheet funding sources that are readily accessible for immediate liquidity needs. Table 23 below presents the components of our liquidity reserve and a comparison of the amounts available as of February 28, 2017 and May 31, 2016.

#### Table 23: Liquidity Reserve

	February 28, 2017							May 31, 2016						
(Dollars in millions)		Total	Accessed Ava			Available		Total		Accessed		vailable		
Cash and cash equivalents and time deposits	\$ 866		\$		\$	\$ 866		545	\$		\$	545		
Committed bank revolving line of credit agreements—unsecured <sup>(1)</sup>		3,165		1		3,164		3,310		1		3,309		
Guaranteed Underwriter Program committed facilities—secured <sup>(2)</sup>		5,798		5,073		725		5,423		4,823		600		
Farmer Mac revolving note purchase agreement, dated March 24, 2011—secured <sup>(3)</sup>		4,500		2,524		1,976		4,500		2,303		2,197		
Farmer Mac revolving note purchase agreement, dated July 31, 2015—secured		300		100		200		300				300		
Total	\$ 14,629		\$	7,698	\$	6,931	\$	14,078	\$	7,127	\$	6,951		

<sup>(1)</sup>The accessed amount of \$1 million relates to a letter of credit issued pursuant to the line of credit agreement.

<sup>(2)</sup> The committed facilities under the Guaranteed Underwriting program are nonrevolving.

<sup>(3)</sup> Availability subject to market conditions.

Cash and cash equivalents and time deposits are a source of liquidity available to support our operations. As displayed in Table 23, cash and cash equivalents and time deposits increased by \$321 million during the first nine months of fiscal year 2017 to \$866 million as of February 28, 2017, primarily due to an additional investment in time deposits of \$300 million. As part of our strategy in managing and reducing refinancing risk associated with the near-term maturity of long-term debt totaling \$1,440 million in the fourth quarter of fiscal year 2017, we issued \$300 million aggregate principal amount of 1.50% dealer medium-term notes on November 1, 2016. We invested those funds in time deposits, pending our repayment of maturing long-term debt.

## **Borrowing Capacity**

In addition to cash and time deposits, our liquidity reserve includes access to funds under committed revolving line of credit agreements with banks, committed loan facilities under the Guaranteed Underwriter Program and our revolving note purchase agreements with Farmer Mac. Following is a discussion of our borrowing capacity and key terms and conditions under each of these facilities.

## Committed Bank Revolving Line of Credit Agreements—Unsecured

Our committed bank revolving lines of credit may be used for general corporate purposes; however, we generally rely on them as a backup source of liquidity to our short-term funding portfolio. Our short-term funding portfolio consists of member and dealer commercial paper, select notes to members and daily liquidity fund investments by members.

In September 2016, NCSC assigned a total of \$50 million of its commitment to another financial institution under our committed bank revolving line of credit agreements, which consisted of \$25 million under the three-year agreement and \$25 million under the five-year agreement. On November 18, 2016, we amended and restated the three-year and five-year committed bank revolving line of credit agreements to extend the maturity dates to November 19, 2019 and November 19, 2021, respectively, and to terminate certain third-party bank commitments totaling \$165 million under the three-year agreement and \$45 million under the five-year agreement. This reduction was partially offset by an increase in commitment amounts from certain existing banks of \$8 million under each of the three-year and five-year agreements. We also terminated NCSC's remaining commitment of \$60 million. As a result, the total commitment amount from third-parties under the three-year facility and the five-year facility is \$1,533 million and \$1,632 million, respectively, resulting in a combined total commitment amount under the two facilities of \$3,165 million. Under our current committed bank revolving line of credit agreements, we have the ability to request up to \$300 million of letters of credit, which would result in a reduction in the remaining available amount under the facilities.

Table 24 presents the total commitment, the net amount available for use and the outstanding letters of credit under our committed bank revolving line of credit agreements as of February 28, 2017. We did not have any outstanding borrowings under our committed bank revolving line of credit agreements as of February 28, 2017.

		February 28, 2017						
(Dollars in millions)	Cor	Total nmitment	Letters of Credit Outstanding		Net Available for Advance		Maturity	Annual Facility Fee <sup>(1)</sup>
3-year agreement	\$	1,533	\$	_	\$	1,533	November 19, 2019	7.5 bps
5-year agreement		1,632		1		1,631	November 19, 2021	10 bps
Total	\$	3,165	\$	1	\$	3,164		

#### Table 24: Committed Bank Revolving Line of Credit Agreements

<sup>(1)</sup>Facility fee based on CFC's senior unsecured credit ratings in accordance with the established pricing schedules at the inception of the related agreement.

The committed bank revolving line of credit agreements do not contain a material adverse change clause or rating triggers that would limit the banks' obligations to provide funding under the terms of the agreements; however, we must be in compliance with the covenants to draw on the facilities. We have been and expect to continue to be in compliance with the covenants under our committed bank revolving line of credit agreements. As such, we could draw on these facilities to repay dealer or member commercial paper that cannot be rolled over. See "Debt Covenants and Financial Ratios" below for additional information, including the specific financial ratio requirements under our committed bank revolving line of credit agreements.

### **Guaranteed Underwriter Program Committed Facilities—Secured**

Under the Guaranteed Underwriter Program we can borrow from the Federal Financing Bank and use the proceeds to make loans to electric cooperatives or to refinance existing indebtedness. As part of the program, we pay fees, based on outstanding borrowings, that support the USDA Rural Economic Development Loan and Grant program. The borrowings under this program are guaranteed by RUS.

On December 1, 2016, we closed on a \$375 million Series L committed loan facility from the Federal Financing Bank guaranteed by RUS pursuant to the Guaranteed Underwriter Program. Under the Series L facility, we are able to borrow any time before October 15, 2019, with each advance subject to quarterly amortization and a final maturity not longer than 20 years from the advance date. As a result of this new commitment, the total for committed facilities under the Guaranteed Underwriter Program increased to \$5,798 million, with up to \$725 million available under these facilities as of February 28, 2017.

We borrowed \$250 million with a 20 year final maturity under the Guaranteed Underwriter Program during the nine months ended February 28, 2017. As part of this program, we had committed loan facilities from the Federal Financing Bank of up to \$725 million available as of February 28, 2017. Of this amount, \$100 million is available for advance through October 15, 2017, \$250 million is available for advance through January 15, 2019 and \$375 million is available for advance through October 15, 2019.

We are required to pledge eligible distribution system or power supply system loans as collateral in an amount at least equal to the total outstanding borrowings under the Guaranteed Underwriter Program. See "Consolidated Balance Sheet Analysis —Debt—Collateral Pledged" and "Note 4—Loans and Commitments" for additional information on pledged collateral.

#### Farmer Mac Revolving Note Purchase Agreements—Secured

As indicated in Table 23, we have two revolving note purchase agreements with Farmer Mac, which together allow us to borrow up to \$4,800 million from Farmer Mac. Under the terms of the first revolving note purchase agreement with Farmer Mac dated March 24, 2011, as amended, we can borrow up to \$4,500 million at any time through January 11, 2020, and such date shall automatically extend on each anniversary date of the closing for an additional year, unless prior to any such anniversary date, Farmer Mac provides us with a notice that the draw period will not be extended beyond the remaining

term. This revolving note purchase agreement allows us to borrow, repay and re-borrow funds at any time through maturity, as market conditions permit, provided that the outstanding principal amount at any time does not exceed the total available under the agreement. Each borrowing under the revolving note purchase agreement is evidenced by a pricing agreement setting forth the interest rate, maturity date and other related terms as we may negotiate with Farmer Mac at the time of each such borrowing. We may select a fixed rate or variable rate at the time of each advance with a maturity as determined in the applicable pricing agreement. We had outstanding secured notes payable under this program totaling \$2,524 million as of February 28, 2017, and an available borrowing amount of \$1,976 million.

Under the terms of the second revolving note purchase agreement with Farmer Mac dated July 31, 2015, we can borrow up to \$300 million at any time through July 31, 2018. This agreement also allows us to borrow, repay and re-borrow funds at any time through maturity, provided that the outstanding principal amount at any time does not exceed the total available under the agreement. We had outstanding secured notes payable under this program totaling \$100 million as of February 28, 2017, and an available borrowing amount of \$200 million. The secured notes payable of \$100 million were repaid in full subsequent to February 28, 2017.

Pursuant to both Farmer Mac revolving note purchase agreements, we are required to pledge eligible distribution system or power supply system loans as collateral in an amount at least equal to the total principal amount of notes outstanding. See "Consolidated Balance Sheet Analysis—Debt—Collateral Pledged" and "Note 4—Loans and Commitments" for additional information on pledged collateral.

## Long-Term and Subordinated Debt

Long-term and subordinated debt represents the most significant component of our funding. The issuance of long-term debt allows us to reduce our reliance on short-term borrowings and manage our refinancing and interest rate risk, due in part to the multi-year contractual maturity structure of long-term debt. In addition to private debt issuances, we also issue debt in the public capital markets. Under the SEC rules, we are classified as a "well-known seasoned issuer." In September 2016, we filed a new shelf registration statement for our collateral trust bonds under which we can register an unlimited amount of collateral trust bonds until September 2019. See "MD&A—Liquidity Risk" of our 2016 Form 10-K for additional information on our shelf registration statements with the SEC.

As discussed in "Consolidated Balance Sheet Analysis—Debt," long-term and subordinated debt totaled \$20,417 million and accounted for 86% of total debt outstanding as of February 28, 2017, compared with \$19,659 million, or 87%, of total debt outstanding as of May 31, 2016.

Table 25 summarizes long-term and subordinated debt issuances and principal maturities and amortizations, including repurchases and redemptions, during the nine months ended February 28, 2017.

## Table 25: Issuances and Maturities of Long-Term and Subordinated Debt<sup>(1)</sup>

	Nine Months Ended February 28, 2017								
(Dollars in thousands)		Issuances	Maturities						
Long-term and subordinated debt activity:									
Collateral trust bonds	\$	450,000	\$	305,000					
Guaranteed Underwriter Program notes payable		250,000		29,520					
Farmer Mac notes payable		350,000		28,894					
Medium-term notes sold to members		196,072		231,695					
Medium-term notes sold to dealers		472,833		344,813					
Other notes payable				3,950					
Members' subordinated certificates		2,743		25,946					
Total <sup>(1)</sup>	\$	1,721,648	\$	969,818					

<sup>(1)</sup>Excludes unamortized debt issuance costs and discounts.

Table 26 summarizes the scheduled amortization of the principal amount of long-term debt, subordinated deferrable debt and members' subordinated certificates as of February 28, 2017.

Dollars in thousands)		Amount Maturing <sup>(1)</sup>	% of Total
Fiscal year ending:			
May 31, 2017	\$	1,411,261	7%
May 31, 2018		1,234,948	6
May 31, 2019		2,355,651	12
May 31, 2020		1,383,798	7
May 31, 2021		1,326,301	6
Thereafter		12,704,062	62
Total	\$	20,416,021	100%

#### Table 26: Principal Maturity of Long-Term Debt and Subordinated Debt

(1) Excludes \$1 million in subscribed and unissued member subordinated certificates for which a payment has been received. Member loan subordinated certificates totaling \$291 million amortize annually based on the unpaid principal balance of the related loan.

#### **Credit Ratings**

Our funding and liquidity, borrowing capacity, ability to access capital markets and other sources of funds and the cost of these funds are partially dependent on our credit ratings. Rating agencies base their ratings on numerous factors, including liquidity, capital adequacy, industry position, member support, management, asset quality, quality of earnings and the probability of systemic support. Significant changes in these factors could result in different ratings. Table 27 displays our credit ratings as of February 28, 2017.

## Table 27: Credit Ratings

	<b>February 28, 2017</b>					
	Moody's	S&P	Fitch			
Long-term issuer credit rating <sup>(1)</sup>	A2	Α	Α			
Senior secured debt <sup>(2)</sup>	A1	Α	A+			
Senior unsecured debt <sup>(3)</sup>	A2	Α	Α			
Commercial paper	P-1	A-1	F1			
Outlook	Stable	Stable	Stable			

<sup>(1)</sup> Based on our senior unsecured debt rating.

<sup>(2)</sup>Applies to our collateral trust bonds.

<sup>(3)</sup>Applies to our medium-term notes.

In order to access the commercial paper markets at attractive rates, we believe we need to maintain our current commercial paper credit ratings of P-1 by Moody's, A-1 by S&P and F1 by Fitch. In addition, the notes payable to the Federal Financing Bank under the Guaranteed Underwriter Program contain a provision that if during any portion of the fiscal year, our senior secured credit ratings do not have at least two of the following ratings: (i) A3 or higher from Moody's, (ii) A- or higher from S&P, (iii) A- or higher from Fitch or (iv) an equivalent rating from a successor rating agency to any of the above rating agencies, we may not make cash patronage capital distributions in excess of 5% of total patronage capital. See "Credit Risk—Counterparty Credit Risk—Credit Risk-Related Contingent Features" above for information on credit rating provisions related to our derivative contracts.

### Projected Near-Term Sources and Uses of Liquidity

As discussed above, our primary sources of liquidity include cash flows from operations, our short-term funding portfolio, our liquidity reserve and the issuance of long-term and subordinated debt, as well as loan principal and interest payments. Our primary uses of liquidity include loan advances to members, principal and interest payments on borrowings, periodic settlement payments related to derivative contracts, costs related to the disposition of foreclosed assets and operating expenses.

Table 28 displays our projected sources and uses of cash, by quarter, over the next six quarters through the quarter ending August 31, 2018. In projecting our liquidity position, we assume that the amount of time deposit investments will remain consistent with current levels over the next six quarters. Our assumptions include the following: (i) the estimated issuance of long-term debt, including collateral trust bonds and private placement of term debt, is based on maintaining a matched funding position within our loan portfolio with our bank revolving lines of credit serving as a backup liquidity facility for commercial paper; (ii) long-term loan scheduled amortization payments represent the scheduled long-term loan payments for loans outstanding as of February 28, 2017 and our current estimate of long-term loan prepayments, which the amount and timing of are subject to change; (iii) other loan repayments and other loan advances primarily relate to line of credit repayments and advances; (iv) long-term loan advances reflect our current estimate of member demand for loans, which the amount and timing of are subject to change.

### Table 28: Projected Sources and Uses of Liquidity<sup>(1)</sup>

		1	Proj	ected Sou	rces o	f Liquidity			Projected Uses of Liquidity									
(Dollars in millions)	Commere Paper Do Issuanc Repayme	ebt e/		Long- Term Debt suance		nticipated Loan ayments <sup>(2)</sup>	Pr So	urces of		Long-Term Debt Maturities <sup>(3)</sup>		Deht		Long- Term Loan Ivances	rm Projected an Uses of		Cumulative Excess Sources (Uses) of Liquidity <sup>(4)</sup>	
3Q17															\$	866		
4Q17	\$	110	\$	1,040	\$	302	\$	1,452	\$	1,440	\$	421	\$	1,861		457		
1Q18				271		313		584		166		387		553		488		
2Q18		(50)		174		312		436		174		255		429		495		
3Q18				843		315		1,158		809		479		1,288		365		
4Q18				260		285		545		258		251		509		401		
1Q19		_		190		297		487		150		408		558		330		
Total	\$	60	\$	2,778	\$	1,824	\$	4,662	\$	2,997	\$	2,201	\$	5,198				

<sup>(1)</sup> The dates presented represent the end of each quarterly period through the quarter ending August 31, 2018.

<sup>(2)</sup> Anticipated loan repayments include scheduled loan amortizations, repricings and sales.

<sup>(3)</sup>Long-term debt maturities also includes medium-term notes with an original maturity of one year or less.

<sup>(4)</sup>Cumulative excess sources (uses) of liquidity includes cash and time deposits.

As displayed in Table 28, we currently expect the amount of new long-term loan advances to exceed anticipated loan repayments over the next 12 months by approximately \$300 million. The estimates presented above are developed at a particular point in time based on our expected future business growth and funding. Our actual results and future estimates may vary, perhaps significantly, from the current projections, as a result of changes in market conditions, management actions or other factors.

#### **Debt Covenants and Financial Ratios**

We were in compliance with all covenants and conditions under our committed bank revolving line of credit agreements and senior debt indentures as of February 28, 2017. As discussed above in "Summary of Selected Financial Data," the financial covenants set forth in our committed bank revolving line of credit agreements and senior debt indentures are based on adjusted financial measures. These adjusted measures consist of adjusted TIER and adjusted senior debt-to-total equity ratio. We provide a reconciliation of these measurements to the most comparable GAAP measures and an explanation of the adjustments below in "Non-GAAP Financial Measures."

### Covenants—Committed Bank Revolving Line of Credit Agreements

Table 29 presents the required and actual financial ratios under our committed bank revolving line of credit agreements as of February 28, 2017 and May 31, 2016.

## Table 29: Financial Covenant Ratios Under Committed Bank Revolving Line of Credit Agreements<sup>(1)</sup>

		Actual				
	Requirement	February 28, 2017	May 31, 2016			
Minimum average adjusted TIER over the six most recent fiscal quarters	1.025	1.20	1.26			
Minimum adjusted TIER for the most recent fiscal year	1.05	1.21	1.21			
Maximum ratio of adjusted senior debt-to-total equity	10.00	5.83	5.52			

(1) Adjusted TIER is calculated based on adjusted net income (loss) plus adjusted interest expense for the period, divided by adjusted interest expense for the period. In addition to the adjustments made to the leverage ratio set forth under "Non-GAAP Financial Measures," adjusted senior debt excludes guarantees to member systems that have certain investment-grade credit ratings from Moody's and S&P.

In addition to the financial covenants, our committed bank revolving line of credit agreements generally prohibit liens on loans to members except for liens pursuant to the following:

- under terms of our indentures,
- related to taxes that are being contested or are not delinquent,
- stemming from certain legal proceedings that are being contested in good faith,
- created by CFC to secure guarantees by CFC of indebtedness, the interest on which is excludable from the gross income of the recipient for federal income tax purposes,
- · granted by any subsidiary to CFC and
- to secure other indebtedness of CFC of up to \$10,000 million plus an amount equal to the incremental increase in CFC's allocated Guaranteed Underwriter Program obligations, provided that the aggregate amount of such indebtedness may not exceed \$12,500 million. The amount of our secured indebtedness under this provision for all of our committed bank revolving line of credit agreements was \$7,635 million as of February 28, 2017.

### **Covenants**—**Debt** Indentures

Table 30 presents the required and actual financial ratios as defined under our 1994 collateral trust bonds indenture and our medium-term notes indentures in the U.S. markets as of February 28, 2017 and May 31, 2016.

#### **Table 30 : Financial Ratios Under Debt Indentures**

		Actu	ıal
	Requirement	February 28, 2017	May 31, 2016
Maximum ratio of adjusted senior debt to total equity (1)	20.00	6.95	7.33

(1) The ratio calculation includes the adjustments made to the leverage ratio under "Non-GAAP Financial Measures," with the exception of the adjustments to exclude the noncash impact of derivative financial instruments and adjustments from total liabilities and total equity.

In addition to the above financial covenant requirement, we are required to pledge collateral pursuant to the provisions of certain of our borrowing agreements. We provide information on collateral pledged or on deposit above under "Consolidated Balance Sheet Analysis—Debt—Collateral Pledged."

#### **Debt Ratio Analysis**

We provide the calculations for our primary debt ratios, which include the adjusted leverage and adjusted debt-to-equity ratios, and a reconciliation to the most comparable GAAP measures (the leverage and debt-to-equity ratios) below in "Non-

GAAP Financial Measures." We explain the basis for the adjustments made to derive the adjusted ratios in our 2016 Form 10-K under "MD&A—Non-GAAP Financial Measures."

## Leverage Ratio

The leverage ratio was 22.09-to-1 as of February 28, 2017, compared with 29.81-to-1 as of May 31, 2016. The decrease in the leverage ratio was due to an increase in total equity of \$330 million, primarily attributable to our reported net income for the period, and a decrease in total guarantees of \$22 million, which was partially offset by an increase in total liabilities of \$1,009 million due to the increase in debt to fund our loan portfolio growth.

The leverage ratio under the financial covenants of our committed bank revolving line of credit agreements is adjusted to exclude certain items, which are detailed in Table 34. The adjusted leverage ratio was 6.36-to-1 as of as of February 28, 2017, compared with 6.08-to-1 as of May 31, 2016. The increase in the adjusted leverage ratio was due to an increase in adjusted liabilities of \$1,292 million, attributable to the increase in debt to fund our loan portfolio growth, which was partially offset by an increase in adjusted equity of \$48 million and the decrease of \$22 million in total guarantees.

## Debt-to-Equity Ratio

The debt-to-equity ratio was 21.32-to-1 as of February 28, 2017, compared with 28.69-to-1 as of May 31, 2016. The decrease in the debt-to-equity ratio was attributable to the increase in total equity of \$330 million, which was partially offset by the increase in total liabilities of \$1,009 million.

The adjusted debt-to-equity ratio was 6.11-to-1 as of February 28, 2017, compared with 5.82-to-1 as of May 31, 2016. The increase in the adjusted debt-to-equity ratio was attributable to the increase in adjusted liabilities of \$1,292 million, which was partially offset by the increase in adjusted equity of \$48 million.

# MARKET RISK

Interest rate risk represents our primary market risk. Interest rate risk is the risk arising from movements in interest rates that may result in differences between the timing of contractual maturities, re-pricing characteristics and prepayments on our assets and their related liabilities.

## **Interest Rate Risk**

Our interest rate risk exposure is primarily related to the funding of the fixed-rate loan portfolio. Our Asset Liability Committee provides oversight over maintaining our interest rate position within a prescribed policy range using approved strategies. The Asset Liability Committee reviews a complete interest rate risk analysis, reviews proposed modifications, if any, to our interest rate risk management strategy and considers adopting strategy changes. Our Asset Liability Committee monitors interest rate risk and generally meets monthly to review and discuss information such as national economic forecasts, federal funds and interest rate forecasts, interest rate gap analysis, our liquidity position, loan and debt maturities, short-term and long-term funding needs, anticipated loan demands, credit concentration risk, derivative counterparty exposure and financial forecasts. The Asset Liability Committee also discusses the composition of fixed-rate versus variable-rate lending, new funding opportunities, changes to the nature and mix of assets and liabilities for structural mismatches, and interest rate swap transactions.

## Matched Funding Objective

Our funding objective is to manage the matched funding of asset and liability repricing terms within a range of total assets (excluding derivative assets) deemed appropriate by the Asset Liability Committee based on the current environment and extended outlook for interest rates. We refer to the difference between fixed-rate loans scheduled for amortization or repricing and the fixed-rate liabilities and equity funding those loans as our interest rate gap. Our primary strategies for managing our interest rate risk include the use of derivatives and limiting the amount of fixed-rate assets that can be funded by variable-rate debt to a specified percentage of adjusted total assets based on market conditions.

We provide our members with many options on loans with regard to interest rates, the term for which the selected interest rate is in effect and the ability to convert or prepay the loan. Long-term loans generally have maturities of up to 35 years. Borrowers may select fixed interest rates for periods of one year through the life of the loan. We do not match fund the majority of our fixed-rate loans with a specific debt issuance at the time the loans are advanced. We fund the amount of fixed-rate assets that exceed fixed-rate debt and members' equity with short-term debt, primarily commercial paper.

### Interest Rate Gap Analysis

To monitor and mitigate interest rate risk in the funding of fixed-rate loans, we perform a monthly interest rate gap analysis that provides a comparison between fixed-rate assets repricing or maturing by year and fixed-rate liabilities and members' equity maturing by year.

We maintain an unmatched position on our fixed-rate assets within a targeted range of adjusted total assets. The limited unmatched position is intended to provide flexibility to ensure that we are able to match the current maturing portion of long-term fixed rate loans based on maturity date and the opportunity in the current low interest rate environment to increase the gross yield on our fixed rate assets without taking what we would consider to be excessive risk.

Table 31 displays the scheduled amortization and repricing of fixed-rate assets and liabilities outstanding as of February 28, 2017. We exclude variable-rate loans from our interest rate gap analysis as we do not consider the interest rate risk on these loans to be significant because they are subject to repricing at least monthly. Loans with variable interest rates accounted for 9% and 7% of our total loan portfolio as of February 28, 2017 and May 31, 2016, respectively. Fixed-rate liabilities include debt issued at a fixed rate as well as variable-rate debt swapped to a fixed rate using interest rate swaps. Fixed-rate debt swapped to a variable rate using interest rate swaps is excluded from the analysis since it is used to match fund the variable-rate loan pool. With the exception of members' subordinated certificates, which are generally issued with extended maturities, and commercial paper, our liabilities have average maturities that closely match the repricing terms, but not the maturities, of our fixed-rate loans.

(Dollars in millions)	Prior to 5/31/17	Two Years 6/1/17 to 5/31/19	Two Years 6/1/19 to 5/31/21	Five Years 6/1/21 to 5/31/26	10 Years 6/1/26 to 5/31/36	1/36 and hereafter	Total
Asset amortization and repricing	\$ 431	\$3,811	\$2,855	\$ 5,451	\$6,636	\$ 2,985	\$ 22,169
Liabilities and members' equity:							
Long-term debt	\$ 519	\$4,415	\$2,513	\$4,726	\$4,133	\$ 1,329	\$ 17,635
Subordinated certificates	4	38	56	908	272	687	1,965
Members' equity <sup>(1)</sup>	_	—	26	89	313	870	1,298
Total liabilities and members' equity	\$ 523	\$4,453	\$2,595	\$5,723	\$4,718	\$ 2,886	\$ 20,898
Gap <sup>(2)</sup>	\$ (92)	\$ (642)	\$ 260	\$ (272)	\$1,918	\$ 99	\$ 1,271
Cumulative gap	(92)	(734)	(474)	(746)	1,172	1,271	
Cumulative gap as a % of total assets	(0.36)%	(2.87)%	(1.85)%	(2.91)%	4.58%	4.96%	
Cumulative gap as a % of adjusted total assets $^{(3)}$	(0.36)	(2.88)	(1.86)	(2.92)	4.59	4.98	

### Table 31: Interest Rate Gap Analysis

<sup>(1)</sup>Includes the portion of the allowance for loan losses and subordinated deferrable debt allocated to fund fixed-rate assets and excludes noncash adjustments from the accounting for derivative financial instruments.

The difference, or interest rate gap, of \$1,271 million between the fixed-rate loans scheduled for amortization or repricing of \$22,169 million and the fixed-rate liabilities and equity funding the loans of \$20,898 million presented in Table 31 reflects the amount of fixed-rate assets that are funded with short-term and variable-rate debt as of February 28, 2017. The gap of \$1,271 million represented 4.96% of total assets and 4.98% of adjusted total assets (total assets excluding derivative assets)

<sup>&</sup>lt;sup>(2)</sup>Calculated based on the amount of assets amortizing and repricing less total liabilities and members' equity.

<sup>&</sup>lt;sup>(3)</sup>Adjusted total assets represents total assets reported in our condensed consolidated balance sheets less derivative assets.

as of February 28, 2017. As discussed above, we manage this gap within a prescribed range because funding long-term, fixed-rate loans with short-term and variable-rate debt may expose us to higher interest rate and liquidity risk.

# NON-GAAP FINANCIAL MEASURES

In addition to financial measures determined in accordance with GAAP, management evaluates performance based on certain non-GAAP measures, which we refer to as "adjusted" measures. We provide a discussion of each of these non-GAAP measures in our 2016 Form 10-K under "Item 7. MD&A—Non-GAAP Measures." Below we provide a reconciliation of our adjusted measures to the most comparable GAAP measures. We believe our non-GAAP adjusted metrics, which are not a substitute for GAAP and may not be consistent with similarly titled non-GAAP measures used by other companies, provide meaningful information and are useful to investors because the financial covenants in our committed bank revolving line of credit agreements and debt indentures are based on these adjusted metrics and management uses these metrics to compare operating results across financial reporting periods, for internal budgeting and forecasting purposes, for compensation decisions and for short- and long-term strategic planning decisions.

### Statements of Operations Non-GAAP Adjustments and Calculation of Adjusted TIER

Table 32 provides a reconciliation of adjusted interest expense, adjusted net interest income and adjusted net income to the comparable GAAP measures. The adjusted amounts are used in the calculation of our adjusted net interest yield and adjusted TIER.

	Nine Months Ended								
(Dollars in thousands)	February 28, 2017			ebruary 29, 2016	1	February 28, 2017	February 29, 2016		
Interest expense	\$	(186,740)	\$	(171,189)	\$	(551,474)	\$	(504,013)	
Plus: Derivative cash settlements		(19,354)		(22,556)		(64,331)		(65,285)	
Adjusted interest expense	\$	(206,094)	\$	(193,745)	\$	(615,805)	\$	(569,298)	
Net interest income	\$	73,180	\$	82,444	\$	222,437	\$	252,061	
Less: Derivative cash settlements		(19,354)		(22,556)		(64,331)		(65,285)	
Adjusted net interest income	\$	53,826	\$	59,888	\$	158,106	\$	186,776	
Net income (loss)	\$	97,962	\$	(174,382)	\$	361,005	\$	(155,775)	
Less: Derivative forward value		(61,809)		220,480		(259,153)		290,952	
Adjusted net income	\$	36,153	\$	46,098	\$	101,852	\$	135,177	

#### Table 32: Adjusted Financial Measures — Income Statement

We consider the cost of derivatives to be an inherent cost of funding and hedging our loan portfolio and, therefore, economically similar to the interest expense that we recognize on debt issued for funding. We therefore include derivative cash settlements in our adjusted interest expense and exclude the unrealized forward value of derivatives from our adjusted net income.

### **TIER Calculation**

Table 33 presents our TIER and adjusted TIER for the three and nine months ended February 28, 2017 and February 29, 2016.

#### Table 33: TIER and Adjusted TIER

	Three Mon	ths Ended	Nine Months Ended					
	February 28, 2017	February 29, 2016	February 28, 2017	February 29, 2016				
TIER <sup>(1)</sup>	1.52		1.65	0.69				
Adjusted TIER <sup>(2)</sup>	1.18	1.24	1.17	1.24				

<sup>(1)</sup> TIER is calculated based on net income plus interest expense for the period divided by interest expense for the period. For the three months ended February 29, 2016, we reported a net loss of \$174 million, which resulted in no TIER coverage.

(2) Adjusted TIER is calculated based on adjusted net income plus adjusted interest expense for the period divided by adjusted interest expense for the period.

#### Adjustments to the Calculation of Leverage and Debt-to-Equity Ratios

Table 34 provides a reconciliation between the liabilities and equity used to calculate the leverage and debt-to-equity ratios and the adjusted leverage and adjusted debt-to-equity ratios as of February 28, 2017 and May 31, 2016. As indicated in the table below, subordinated debt is treated in the same manner as equity in calculating our adjusted leverage and adjusted-debt-to-equity ratios pursuant to the financial covenants under our committed bank revolving line of credit agreements.

#### Table 34: Adjusted Financial Measures — Balance Sheet

(Dollars in thousands)	February 28, 2017		May 31, 2016			
Total liabilities	\$	24,462,227	\$	23,452,822		
Less:						
Derivative liabilities		(339,809)		(594,820)		
Debt used to fund loans guaranteed by RUS		(168,977)		(173,514)		
Subordinated deferrable debt		(742,241)		(742,212)		
Subordinated certificates		(1,420,608)		(1,443,810)		
Adjusted total liabilities	\$	21,790,592	\$	20,498,466		
Total equity	\$	1,147,338	\$	817,378		
Less:						
Prior year cumulative derivative forward value adjustments		520,357		299,274		
Year-to-date derivative forward value (gains) losses, net		(259,153)		221,083		
Accumulated other comprehensive income (1)		(3,896)		(4,487)		
Plus:						
Subordinated certificates		1,420,608		1,443,810		
Subordinated deferrable debt		742,241		742,212		
Adjusted total equity	\$	3,567,495	\$	3,519,270		
Guarantees <sup>(2)</sup>	\$	887,484	\$	909,208		

<sup>(1)</sup> Represents the accumulated other comprehensive income related to derivatives. Excludes \$10 million and \$7 million of accumulated other comprehensive income as of February 28, 2017 and May 31, 2016, respectively, related to the unrecognized gains on our investments. It also excludes \$10 million of accumulated other comprehensive loss related to foreclosed assets as of May 31, 2016 and \$1 million of accumulated other comprehensive loss related to a defined benefit pension plan as of February 28, 2017 and May 31, 2016.

<sup>(2)</sup> Guarantees are used in the calculation of leverage and adjusted leverage ratios below.

Table 35 displays the calculations of our leverage and debt-to-equity ratios and our adjusted leverage and debt-to-equity ratios as of February 28, 2017 and May 31, 2016.

## Table 35: Leverage and Debt-to-Equity Ratios

	February 28, 2017	May 31, 2016
Leverage ratio <sup>(1)</sup>	22.09	29.81
Adjusted leverage ratio <sup>(2)</sup>	6.36	6.08
Debt-to-equity ratio <sup>(3)</sup>	21.32	28.69
Adjusted debt-to-equity ratio (4)	6.11	5.82

<sup>(1)</sup> Calculated based on total liabilities and guarantees as of the end of the period divided by total equity as of the end of the period.

(2) Calculated based on adjusted total liabilities and guarantees as of the end of the period divided by adjusted total equity as of the end of the period. See Table 34 for the adjustments to reconcile total liabilities and guarantees and total equity to adjusted total liabilities and guarantees and adjusted total equity.

<sup>&</sup>lt;sup>(3)</sup> Calculated based on total liabilities as of the end of the period divided by total equity as of the end of the period.

<sup>&</sup>lt;sup>(4)</sup> Calculated based on adjusted total liabilities at period end divided by adjusted total equity at period end.

# NOTE 1—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

## The Company

National Rural Utilities Cooperative Finance Corporation ("CFC") is a member-owned cooperative association incorporated under the laws of the District of Columbia in April 1969. CFC's principal purpose is to provide its members with financing to supplement the loan programs of the Rural Utilities Service ("RUS") of the United States Department of Agriculture ("USDA"). CFC makes loans to its rural electric members so they can acquire, construct and operate electric distribution, generation, transmission and related facilities. CFC also provides its members with credit enhancements in the form of letters of credit and guarantees of debt obligations. As a cooperative, CFC is owned by and exclusively serves its membership, which consists of not-for-profit entities or subsidiaries or affiliates of not-for-profit entities. CFC is exempt from federal income taxes.

## **Basis of Presentation and Use of Estimates**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") for interim financial information. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and related disclosures. The most significant estimates and assumptions involve establishing the allowance for loan losses and determining the fair value of financial instruments and other assets and liabilities. While management makes its best judgment, actual amounts or results could differ from these estimates. The results of operations in the interim financial statements are not necessarily indicative of the results that may be expected for the full year.

These interim unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements, and related notes thereto, included in CFC's Annual Report on Form 10-K for the fiscal year ended May 31, 2016 ("2016 Form 10-K").

## **Principles of Consolidation**

Our accompanying condensed consolidated financial statements include the accounts of CFC, Rural Telephone Finance Cooperative ("RTFC"), National Cooperative Services Corporation ("NCSC") and subsidiaries created and controlled by CFC to hold foreclosed assets. All intercompany balances and transactions have been eliminated. RTFC was established to provide private financing for the rural telecommunications industry. NCSC may provide financing to members of CFC, government or quasi-government entities which own electric utility systems that meet the Rural Electrification Act definition of "rural", and the for-profit and nonprofit entities that are owned, operated or controlled by, or provide significant benefits to certain members of CFC. CFC had one entity, Caribbean Asset Holdings, LLC ("CAH"), that held foreclosed assets as of May 31, 2016. On July 1, 2016, the sale of CAH was completed. As a result, we did not carry any foreclosed assets on our condensed consolidated balance sheet as of February 28, 2017. Unless stated otherwise, references to "we," "our" or "us" relate to CFC and its consolidated entities.

## **Interest Income**

The following table presents interest income, categorized by loan and investment type, for the three and nine months ended February 28, 2017 and February 29, 2016.

		Three Mo	nths E	Inded	Nine Months Ended				
(Dollars in thousands)		ebruary 28, 2017	F	ebruary 29, 2016	Fe	ebruary 28, 2017	Fe	bruary 29, 2016	
Interest income on loans and investments:									
Long-term fixed-rate loans <sup>(1)</sup>	\$	245,480	\$	240,933	\$	733,425	\$	716,736	
Long-term variable-rate loans		5,047		5,077		14,561		14,919	
Line of credit loans		6,538		6,335		18,057		18,919	
TDR loans <sup>(2)</sup>		228		163		677		293	
Nonperforming loans		—		81				110	
Investments		2,857		1,323		7,986		5,905	
Other income, net <sup>(3)</sup>		(230)		(279)		(795)		(808)	
Total interest income	\$	259,920	\$	253,633	\$	773,911	\$	756,074	

<sup>(1)</sup> Includes loan conversion fees, which are deferred and recognized in interest income using the effective interest method.

<sup>(2)</sup> Troubled debt restructuring ("TDR") loans.

<sup>(3)</sup> Consists of late payment fees and net amortization of deferred loan fees and loan origination costs.

Deferred income on the condensed consolidated balance sheets consists primarily of deferred loan conversion fees, which totaled \$71 million as of February 28, 2017 and May 31, 2016.

### **Interest Expense**

The following table presents interest expense, categorized by debt product type, for the three and nine months ended February 28, 2017 and February 29, 2016.

		Three Mo	nths E	nded	Nine Months Ended				
(Dollars in thousands)		bruary 28, 2017	Fe	ebruary 29, 2016	Fe	ebruary 28, 2017	February 29, 2016		
Interest expense on debt: <sup>(1)(2)(3)</sup>									
Short-term borrowings	\$	7,907	\$	4,387	\$	18,198	\$	10,311	
Medium-term notes		25,166		21,773		73,456		62,745	
Collateral trust bonds		85,582		83,810		255,582		248,410	
Long-term notes payable		43,929		41,412		131,319		122,766	
Subordinated deferrable debt		9,410		4,785		28,247		14,356	
Subordinated certificates		14,746		15,022		44,672		45,425	
Total interest expense	\$	186,740	\$	171,189	\$	551,474	\$	504,013	

<sup>&</sup>lt;sup>(1)</sup> Represents interest expense and the amortization of discounts on debt.

<sup>(2)</sup> Includes underwriter's fees, legal fees, printing costs and certain accounting fees, which are deferred and recognized in interest expense using the effective interest method. Also includes issuance costs related to dealer commercial paper, which are recognized immediately as incurred.

<sup>(3)</sup> Includes fees related to funding activities, including fees paid to banks participating in our committed bank revolving line of credit agreements. Amounts are recognized as incurred or amortized on a straight-line basis over the life of the agreement.

### Accounting Standards Adopted in Fiscal Year 2017

#### Amendments to the Consolidation Analysis

In February 2015, the Financial Accounting Standard Board ("FASB") issued Accounting Standard Update ("ASU") 2015-02, *Amendments to the Consolidation Analysis*, which makes several modifications to the consolidation guidance for variable interest entities ("VIEs") and general partners' investments in limited partnerships, as well as modifications to the evaluation of whether limited partnerships are VIEs or voting interest entities. The new guidance also amends the consolidation analysis for certain investment funds and excludes certain money market funds. We were required to adopt this guidance either retrospectively or on a modified retrospective basis at the beginning of fiscal year 2017. We adopted this guidance on a modified retrospective basis effective June 1, 2016. The adoption had no impact on our consolidated financial statements.

#### **Recently Issued But Not Yet Adopted Accounting Standards**

### Financial Instruments—Credit Losses: Measurement of Credit Losses on Financial Instruments

In June 2016, FASB issued ASU 2016-13, Financial Instruments—Credit Losses: Measurement of Credit Losses on Financial Instruments, which changes the accounting for credit losses on certain financial assets to an expected loss model from the incurred loss model currently in use. The new guidance will result in earlier recognition of credit losses based on measuring the expected credit losses over the estimated life of financial assets held at each reporting date. The expected loss model will be the basis for determining the allowance for credit losses for loans and leases, unfunded lending commitments, held-to-maturity debt securities and other debt instruments measured at amortized cost. In addition, the new guidance modifies the other-than-temporary impairment model for available-for-sale debt securities to require the recognition of credit losses through a valuation allowance, which allows for the reversal of credit impairments in future periods. The ASU will also require enhanced disclosures to help users of financial statements better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an entity's portfolio. The new standard is effective for fiscal years and interim periods within those fiscal years, beginning after December 15, 2019. Early application will be permitted for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. This update is effective for us on June 1, 2020, the first quarter of fiscal year 2021. Upon adoption, we will be required to record a cumulative-effect adjustment to retained earnings. The impact on our consolidated financial statements from the adoption of this new guidance will depend on the composition and risk profile of our loan portfolio as of the date of adoption. We do not expect to early adopt this guidance.

#### Financial Instruments-Overall: Recognition and Measurement of Financial Assets and Financial Liabilities

In January 2016, FASB issued ASU 2016-01, *Financial Instruments-Overall: Recognition and Measurement of Financial Assets and Financial Liabilities*, which amends certain aspects of the recognition, measurement, presentation and disclosure of certain financial instruments, including equity investments and liabilities measured at fair value under the fair value option. The guidance also updates fair value presentation and disclosure requirements for financial instruments measured at amortized cost. The ASU requires investments in equity securities that do not result in consolidation and are not accounted for under the equity method to be measured at fair value with changes in the fair value recognized through net income, unless one of two available exceptions apply. For financial liabilities where the fair value option has been elected, the portion of the total change in fair value caused by changes in the company's own credit risk is required to be presented separately in other comprehensive income. The classification and measurement guidance is effective for public entities in fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. This update will be effective for us on June 1, 2018, the first quarter of fiscal year 2019. Upon adoption, we will be required to reclassify the gain (loss) related to our equity investments classified as available-for-sale from accumulated other comprehensive income ("AOCI") to retained earnings as a cumulative-effective adjustment and begin recording future changes in fair value in earnings. We had a gain of \$10 million recorded in AOCI for our available-for-sale equity investments as of

February 28, 2017. The impact on our consolidated financial statements at adoption will depend on the net unrealized gains (losses) recorded in AOCI for these equity investments as of the date of adoption.

### **Revenue from Contracts with Customers**

In May 2014, FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, which clarifies the principles for recognizing revenue from contracts with customers and will replace most existing revenue recognition in GAAP when it becomes effective. In July 2015, FASB approved a one year deferral of the effective date of this standard, with a revised effective date for fiscal years beginning after December 15, 2017. Early adoption is permitted, although not prior to fiscal years beginning after December 15, 2016. The new accounting guidance, which does not apply to financial instruments, will be effective for us June 1, 2017, the first quarter of fiscal year 2018. We do not expect the new guidance to have an impact on our consolidated financial statements, as CFC's primary business and source of revenue is from lending.

### NOTE 2—VARIABLE INTEREST ENTITIES

Based on the accounting standards governing consolidations, we are required to consolidate the financial results of RTFC and NCSC because CFC is the primary beneficiary of RTFC and NCSC.

CFC manages the lending activities of RTFC and NCSC. Under separate guarantee agreements, RTFC and NCSC pay CFC a fee to indemnify them against loan losses. CFC is the sole lender to and manages the business operations of RTFC through a management agreement that is automatically renewable on an annual basis unless terminated by either party. RTFC funds its lending programs through loans from CFC. CFC is the primary source of funding to and manages the lending activities of NCSC through a management agreement that is automatically renewable on an annual basis unless terminated by either party. RTFC funds its lending programs through loans from CFC or debt guaranteed by CFC. In connection with these guarantees, NCSC must pay a guarantee fee.

RTFC and NCSC creditors have no recourse against CFC in the event of a default by RTFC and NCSC, unless there is a guarantee agreement under which CFC has guaranteed NCSC or RTFC debt obligations to a third party. CFC had guaranteed \$43 million of NCSC debt, derivative instruments and guarantees with third parties as of February 28, 2017, and CFC's maximum potential exposure for these instruments totaled \$46 million. The maturities for NCSC obligations guaranteed by CFC extend through 2031. Guarantees of NCSC debt and derivative instruments are not presented in the amount in "Note 11—Guarantees" as the debt and derivatives are reported on the condensed consolidated balance sheets. CFC guaranteed \$2 million of RTFC guarantees with third parties as of February 28, 2017. The maturities for RTFC obligations guaranteed by CFC extend through 2017. All CFC loans to RTFC and NCSC are secured by all assets and revenue of RTFC and NCSC. RTFC had total assets of \$459 million including loans outstanding to members of \$363 million, and NCSC had total assets of \$626 million including loans outstanding of \$617 million as of February 28, 2017. CFC had committed to lend RTFC up to \$2,500 million, of which \$344 million was outstanding, as of February 28, 2017. CFC had committed to provide up to \$3,000 million of credit to NCSC, of which \$640 million was outstanding, representing \$597 million of outstanding loans and \$43 million of credit enhancements as of February 28, 2017.

## NOTE 3—INVESTMENT SECURITIES

Our investment securities consist of holdings of Federal Agricultural Mortgage Corporation ("Farmer Mac") preferred and common stock. The following tables present the amortized cost, gross unrealized gains and losses and fair value of our investment securities, all of which were classified as available for sale, as of February 28, 2017 and May 31, 2016.

	February 28, 2017										
(Dollars in thousands)		Amortized Cost		Gross Unrealized Gains		ross ealized osses	Fair Value

Total investment securities, available-for-sale	\$	80,538	\$	7,402	\$		\$	87,940				

We did not have any investment securities in an unrealized loss position as of February 28, 2017 or May 31, 2016. For additional information regarding the unrealized gains (losses) recorded on our available-for-sale investment securities, see "Note 10—Equity—Accumulated Other Comprehensive Income."

## NOTE 4—LOANS AND COMMITMENTS

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are considered loans held for investment. The loans presented on our consolidated balance sheet are classified and accounted for as held for investment. Loans held for investment are carried at the principal amount outstanding, net of premiums, discounts, unearned income and deferred loan fees and costs.

The following table presents the outstanding principal balance of loans to members, including deferred loan origination costs, and unadvanced loan commitments, by loan type and member class, as of February 28, 2017 and May 31, 2016.

	Februar	y 28, 2017	May 3	1, 2016
(Dollars in thousands)	Loans Outstanding	Unadvanced Commitments <sup>(1)</sup>	Loans Outstanding	Unadvanced Commitments <sup>(1)</sup>
Loan type: <sup>(2)</sup>

Long-term fixed-rate loans	\$ 22,066,751	\$	\$ 21,390,576	\$
Long-term variable-rate loans	925,267	4,314,490	757,500	4,508,562
Total long-term loans <sup>(3)</sup>	22,992,018	4,314,490	22,148,076	4,508,562
Line of credit loans	1,258,152	8,153,484	1,004,441	8,696,448
Total loans outstanding <sup>(4)</sup>	24,250,170	12,467,974	23,152,517	13,205,010
Deferred loan origination costs	10,667		10,179	
Loans to members	\$ 24,260,837	\$ 12,467,974	\$ 23,162,696	\$ 13,205,010
Member class: <sup>(2)</sup>				
CFC:				
Distribution	\$ 18,690,627	\$ 8,267,180	\$ 17,674,335	\$ 8,967,730
Power supply	4,522,551	3,163,899	4,401,185	3,191,873
Statewide and associate	56,597	147,077	54,353	155,129
CFC total <sup>(3)</sup>	23,269,775	11,578,156	22,129,873	12,314,732
RTFC	363,006	262,331	341,842	246,657
NCSC	617,389	627,487	680,802	643,621
Total loans outstanding <sup>(4)</sup>	\$ 24,250,170	\$ 12,467,974	\$ 23,152,517	\$ 13,205,010

(1) The interest rate on unadvanced loan commitments is not set until drawn; therefore, the long-term unadvanced loan commitments have been classified in this table as variable-rate unadvanced loan commitments. However, at the time of the advance, the borrower may select a fixed or a variable rate on the new loan.

<sup>(2)</sup> Includes troubled debt restructured loans.

<sup>(3)</sup> Includes long-term loans guaranteed by RUS totaling \$169 million and \$174 million as of February 28, 2017 and May 31, 2016, respectively, and long-term loans covered under the Farmer Mac standby purchase commitment agreement totaling \$852 million and \$926 million as of February 28, 2017 and May 31, 2016, respectively.

<sup>(4)</sup> Represents the unpaid principal balance excluding deferred loan origination costs.

### **Unadvanced Loan Commitments**

Unadvanced loan commitments represent approved and executed loan contracts for which funds have not been advanced to borrowers. The following table summarizes the available balance under unadvanced loan commitments as of February 28, 2017 and the related maturities by fiscal year and thereafter by loan type:

	Available									
(Dollars in thousands)	Balance	 2017	2018		2019		2020	2021		Thereafter
Line of credit loans	\$ 8,153,484	\$ 85,665	\$ 4,855,109	\$	905,597	\$	784,867	\$	689,926	\$ 832,320
Long-term loans	4,314,490	25,120	563,126		870,387		709,467		786,966	1,359,424
Total	\$ 12,467,974	\$ 110,785	\$ 5,418,235	<b>\$</b> 1	1,775,984	<b>\$</b> 1	1,494,334	<b>\$</b> 1	1,476,892	\$ 2,191,744

Unadvanced loan commitments related to line of credit loans are typically for periods not to exceed five years and are generally revolving facilities used for working capital and backup liquidity purposes. Historically, we have experienced a very low utilization rate on line of credit loan facilities, whether or not there is a material adverse change clause. Since we generally do not charge a fee on the unadvanced portion of the majority of our loan facilities, our borrowers will typically request long-term facilities to fund construction work plans and other capital expenditures for periods of up to five years and draw down on the facility over that time. In addition, borrowers will typically request an amount in excess of their immediate estimated loan requirements to avoid the expense related to seeking additional loan funding for unexpected items. These factors contribute to our expectation that the majority of the unadvanced loan commitments will expire without being fully drawn upon and that the total unadvanced amount does not necessarily represent future cash funding requirements.

## Unadvanced Loan Commitments—Conditional

The substantial majority of our line of credit commitments and all of our unadvanced long-term loan commitments include material adverse change clauses. Unadvanced loan commitments subject to material adverse change clauses totaled \$9,813 million and \$10,757 million as of February 28, 2017 and May 31, 2016, respectively. Prior to making an advance on these facilities, we confirm that there has been no material adverse change in the business or condition, financial or otherwise, of the borrower since the time the loan was approved and confirm that the borrower is currently in compliance with loan terms and conditions. In some cases, the borrower's access to the full amount of the facility is further constrained by the designated purpose, imposition of borrower-specific restrictions or by additional conditions that must be met prior to advancing funds.

### Unadvanced Loan Commitments—Unconditional

Unadvanced loan commitments not subject to material adverse change clauses at the time of each advance consisted of unadvanced committed lines of credit totaling \$2,655 million and \$2,448 million as of February 28, 2017 and May 31, 2016, respectively. As such, we are required to advance amounts on these committed facilities as long as the borrower is in compliance with the terms and conditions of the facility.

The following table summarizes the available balance under unconditional committed lines of credit, and the related maturities by fiscal year and thereafter, as of February 28, 2017.

	Available		Notional Maturities of Unconditional Committed Lines of Credit										
(Dollars in thousands)	Available Balance	2017	2018	2019	2020	2021	Thereafter						
Committed lines of credit	\$2,655,038	\$ _	\$444,311	\$579,615	\$550,903	\$425,900	\$654,309						

#### Loan Sales

We transfer, from time to time, loans to third parties under our direct loan sale program. We sold CFC loans with outstanding balances totaling \$33 million and \$84 million, at par for cash, during the nine months ended February 28, 2017 and February 29, 2016, respectively. Because the loans were sold at par, we recorded immaterial losses related to unamortized deferred loan origination costs on the sale.

## **Credit Quality**

We closely monitor loan performance trends to manage and evaluate our credit risk exposure. We seek to provide a balance between meeting the credit needs of our members while also ensuring the sound credit quality of our loan portfolio. Payment status and internal risk rating trends are key indicators, among others, of the level of credit risk within our loan portfolio.

As part of our strategy in managing our credit risk exposure, we entered into a long-term standby purchase commitment agreement with Farmer Mac on August 31, 2015, as amended on May 31, 2016. Under this agreement, we may designate certain loans to be covered under the commitment, subject to approval by Farmer Mac, and in the event any such loan later goes into material default for at least 90 days, upon request by us, Farmer Mac must purchase such loan at par value. We designated, and Farmer Mac approved, loans that had an aggregate outstanding principal balance of \$852 million as of February 28, 2017. Under the agreement, we are required to pay Farmer Mac a monthly fee based on the unpaid principal balance of loans covered under the purchase commitment. No loans had been put to Farmer Mac for purchase, pursuant to this agreement, as of February 28, 2017.

### **Payment Status of Loans**

The tables below present the payment status of loans outstanding by member class as of February 28, 2017 and May 31, 2016.

	February 28, 2017

### Internal Risk Ratings of Loans

We evaluate the credit quality of our loans using an internal risk rating system that employs similar criteria for all member classes. Our internal risk rating system is based on a determination of a borrower's risk of default utilizing both quantitative and qualitative measurements. We have grouped our risk ratings into the categories of pass and criticized based on the criteria below.

- (i) Pass: Borrowers that are not experiencing difficulty and/or not showing a potential or well-defined credit weakness.
- (ii) Criticized: Includes borrowers categorized as special mention, substandard and doubtful as described below:
  - Special mention: Borrowers that may be characterized by a potential credit weakness or deteriorating financial condition that is not sufficiently serious to warrant a classification of substandard or doubtful.
  - Substandard: Borrowers that display a well-defined credit weakness that may jeopardize the full collection of principal and interest.
  - Doubtful: Borrowers that have a well-defined weakness and the full collection of principal and interest is questionable or improbable.

Borrowers included in the pass, special mention, and substandard categories are generally reflected in the general portfolio of loans. Borrowers included in the doubtful category are reflected in the impaired portfolio of loans. Each risk rating is reassessed annually following the receipt of the borrower's audited financial statements; however, interim risk rating downgrades or upgrades may take place at any time as significant events or trends occur.

The following table presents our loan portfolio by risk rating category and member class based on available data as of February 28, 2017 and May 31, 2016.

		Febr	uary 28, 2017		May 31, 2016

#### Allowance for Loan Losses

We maintain an allowance for loan losses at a level estimated by management to provide for probable losses inherent in the loan portfolio as of each balance sheet date. The tables below summarize changes, by company, in the allowance for loan losses as of and for the three and nine months ended February 28, 2017 and February 29, 2016.

	Three Months Ended February 28, 2017

## Troubled Debt Restructured ("TDR") Loans

We did not have any loans modified as TDRs during the nine months ended February 28, 2017. The following table provides a summary of loans modified as TDRs in prior periods, the performance status of these loans and the related unadvanced loan commitments, by member class, as of February 28, 2017 and May 31, 2016.

	F	ebruary 28, 20	17		May 31, 2016							
(Dollars in thousands)	Loans Outstanding	% of Total Loans	Unadvanced Commitments		Loans Outstanding		% of Total Loans	Unadvanced Commitments				
TDR loans:												
Nonperforming TDR loans:												
RTFC	\$	<u>_%</u>	\$	—	\$	3,506	0.01%	\$	—			
Performing TDR loans:												
CFC/Distribution	6,581			—		6,716			—			
RTFC	6,717			_		7,092						
Total performing TDR loans.	13,298	0.05				13,808	0.06					
Total TDR loans	\$ 13,298	0.05%	\$		\$	17,314	0.07%	\$				

As indicated in the table above, we did not have any TDR loans classified as nonperforming as of February 28, 2017. We had TDR loans classified as nonperforming totaling \$4 million as of May 31, 2016.

TDR loans classified as performing totaled \$13 million and \$14 million as of February 28, 2017 and May 31, 2016, respectively. These loans were on accrual status as of the respective dates.

#### **Nonperforming Loans**

In addition to nonperforming TDR loans, we also may have nonperforming loans that have not been modified and classified as a TDR. We classify such loans as nonperforming at the earlier of the date when we determine: (i) interest or principal payments on the loan is past due 90 days or more; (ii) as a result of court proceedings, the collection of interest or principal payments based on the original contractual terms is not expected; or (iii) the full and timely collection of interest or principal is otherwise uncertain. Once a loan is classified as nonperforming, we generally place the loan on nonaccrual status. Interest accrued but not collected at the date a loan is placed on nonaccrual status is reversed against earnings. We had no other loans classified as nonperforming as of February 28, 2017 or May 31, 2016.

The following table shows foregone interest income for loans on nonaccrual status for the three and nine months ended February 28, 2017 and February 29, 2016.

	<b>Three Months Ended</b>				Nine Months Ended				
(Dollars in thousands)		February 28, 2017		February 29, 2016		February 28, 2017		February 29, 2016

Performing TDR loans		_						166	
Nonperforming TDR loans				31		31		77	
Total	\$		\$	33	\$	31	\$	257	

#### **Pledging of Loans**

We are required to pledge eligible mortgage notes in an amount at least equal to the outstanding balance of our secured debt.

The following table summarizes our loans outstanding as collateral pledged to secure our collateral trust bonds, Clean Renewable Energy Bonds, notes payable to Farmer Mac and notes payable under the Guaranteed Underwriter Program of the USDA ("Guaranteed Underwriter Program") and the amount of the corresponding debt outstanding as of

February 28, 2017 and May 31, 2016. See "Note 6—Short-Term Borrowings" and "Note 7—Long-Term Debt" for information on our borrowings.

(Dollars in thousands)		ruary 28, 2017	May 31, 2016

Notes payable outstanding		4,997,884		4,777,404	

## NOTE 5—FORECLOSED ASSETS

Foreclosed assets consist of operating entities or other assets acquired through lending activities in satisfaction of indebtedness. On July 1, 2016, the sale of CAH to ATN VI Holdings, LLC ("Buyer") was completed. As a result, we did not carry any foreclosed assets on our consolidated balance sheet as of February 28, 2017.

Our net proceeds at closing totaled \$109 million, which represents the purchase price of \$144 million less agreed-upon purchase price adjustments as of the closing date. Upon closing, \$16 million of the sale proceeds was deposited into escrow to fund potential indemnification claims for a period of 15 months following the closing. In connection with the sale, RTFC provided a loan in the amount of \$60 million to Buyer to finance a portion of the transaction. ATN International, Inc., the parent corporation of Buyer, has provided a guarantee on an unsecured basis of Buyer's obligations to RTFC pursuant to the financing.

The net proceeds at closing were subject to post-closing adjustments. The Buyer provided a statement of post-closing adjustments and we agreed upon a net amount due to us for post-closing adjustments of approximately \$1 million, which we received during the second quarter of fiscal year 2017. CFC remains subject to potential indemnification claims, as specified in the Purchase Agreement. We recorded expense of less than \$1 million for the current quarter and expense of \$2 million for the nine months ended February 28, 2017 related to CAH. These amounts include the combined impact of adjustments

recorded at the closing date of the sale of CAH, post-closing purchase price adjustments and certain legal costs incurred pertaining to CAH.

Upon closing of the sale of CAH, we derecognized the loss of \$10 million recorded in AOCI attributable to actuarial-related changes in CAH's pension and other postretirement benefit obligations as an offset against the sale proceeds. This derecognition had no effect on our consolidated statement of operations during the three and nine months ended February 28, 2017, as the amount was taken into consideration in the measurement of the CAH impairment loss recorded in fiscal year 2016.

## NOTE 6—SHORT-TERM BORROWINGS

Short-term borrowings consist of borrowings with an original contractual maturity of one year or less and do not include the current portion of long-term debt. Our short-term borrowings totaled \$3,388 million and accounted for 14% of total debt outstanding as of February 28, 2017, compared with \$2,939 million, or 13%, of total debt outstanding as of May 31, 2016.

## **Committed Bank Revolving Line of Credit Agreements**

We had \$3,165 million and \$3,420 million of commitments under committed bank revolving line of credit agreements as of February 28, 2017 and May 31, 2016, respectively. Under our current committed bank revolving line of credit agreements, we have the ability to request up to \$300 million of letters of credit, which would result in a reduction in the remaining available amount under the facilities.

In September 2016, NCSC assigned a total of \$50 million of its commitment to another financial institution under our committed bank revolving line of credit agreements, which consisted of \$25 million under the three-year agreement and \$25 million under the five-year agreement.

On November 18, 2016, we amended and restated the three-year and five-year committed bank revolving line of credit agreements to extend the maturity dates to November 19, 2019 and November 19, 2021, respectively, and to terminate certain third-party bank commitments totaling \$165 million under the three-year agreement and \$45 million under the five-year agreement. This reduction was partially offset by an increase in commitment amounts from certain existing banks of \$8 million under each of the three-year and five-year agreements. We also terminated NCSC's remaining commitment of \$60 million. As a result, the total commitment amount from third-parties under the three-year facility and the five-year facility is \$1,533 million and \$1,632 million, respectively, resulting in a combined total commitment amount under the two facilities of \$3,165 million.

The following table presents the total commitment, the net amount available for use and the outstanding letters of credit under our committed bank revolving line of credit agreements as of February 28, 2017 and May 31, 2016.

	Fet	oruary 2	28, 2017		May 31, 2016

<sup>(1)</sup>Reflects amounts available from unaffiliated third parties that are not consolidated by CFC.

<sup>(2)</sup> Facility fee determined by CFC's senior unsecured credit ratings based on the pricing schedules put in place at the inception of the related agreement.

We were in compliance with all covenants and conditions under our committed bank revolving line of credit agreements and there were no borrowings outstanding under these agreements as of February 28, 2017 and May 31, 2016.

## NOTE 7—LONG-TERM DEBT

Borrowings with an original contractual maturity of greater than one year are classified as long-term debt. The following table displays long-term debt outstanding, by debt type, as of February 28, 2017 and May 31, 2016.

(Dollars in thousands)	Feb	ruary 28, 2017	May 31, 2016

#### **Collateral Trust Bonds**

On February 7, 2017, we issued \$450 million aggregate principal amount of 2.95% collateral trust bonds due 2024.

#### **Secured Notes Payable**

We had outstanding secured notes payable totaling \$4,998 million and \$4,777 million as of February 28, 2017 and May 31, 2016, respectively, under a bond purchase agreement with the Federal Financing Bank and a bond guarantee agreement with RUS issued under the Guaranteed Underwriter Program, which provides guarantees to the Federal Financing Bank. We pay RUS a fee of 30 basis points per year on the total amount borrowed. We are required to pledge eligible distribution system or power supply system loans as collateral in an amount at least equal to the total principal amount of notes outstanding

under the Guaranteed Underwriter Program. See "Note 4—Loans and Commitments" for additional information on the collateral pledged to secure notes payable under this program.

On December 1, 2016, we closed on the \$375 million committed ("Series L") loan facility from the Federal Financing Bank guaranteed by RUS pursuant to the Guaranteed Underwriter Program. Under the Series L facility, we are able to borrow an additional \$375 million any time before October 15, 2019 with each advance amortizing quarterly and having a final maturity no longer than 20 years from the advance date. We borrowed \$250 million under the Guaranteed Underwriter Program during the nine months ended February 28, 2017. We had up to \$725 million available under the Guaranteed Underwriter Program as of February 28, 2017.

We have two revolving note purchase agreements with Farmer Mac, which together allow us to borrow up to \$4,800 million from Farmer Mac. Under the terms of the first revolving note purchase agreement with Farmer Mac dated March 24, 2011, as amended, we can borrow up to \$4,500 million at any time through January 11, 2020, and such date shall automatically extend on each anniversary date of the closing for an additional year, unless prior to any such anniversary date, Farmer Mac provides us with a notice that the draw period will not be extended beyond the remaining term. This revolving note purchase agreement allows us to borrow, repay and re-borrow funds at any time through maturity, as market conditions permit, provided that the outstanding principal amount at any time does not exceed the total available under the agreement. Each borrowing under the revolving note purchase agreement is evidenced by a pricing agreement setting forth the interest rate, maturity date and other related terms as we may negotiate with Farmer Mac at the time of each such borrowing. We may select a fixed rate or variable rate at the time of each advance with a maturity as determined in the applicable pricing agreement. Under this note purchase agreement with Farmer Mac, we had outstanding secured notes payable totaling \$2,524 million and \$2,303 million as of February 28, 2017 and May 31, 2016. We borrowed \$250 million under this note purchase agreement with Farmer Mac, 250 million under this note purchase agreement with Farmer Mac March Mac 31, 2016.

Under the terms of the second revolving note purchase agreement with Farmer Mac dated July 31, 2015, we can borrow up to \$300 million at any time through July 31, 2018. This agreement also allows us to borrow, repay and re-borrow funds at any time through maturity, provided that the outstanding principal amount at any time does not exceed the total available under the agreement. On February 22, 2017, we received an advance of \$100 million under this committed note purchase agreement with Farmer Mac, resulting in outstanding secured notes payable under this note purchase agreement of \$100 million as of February 28, 2017. This advance was repaid in full subsequent to February 28, 2017.

We are required to pledge eligible distribution system or power supply system loans as collateral in an amount at least equal to the total principal amount of notes outstanding under each of our Farmer Mac revolving note purchase agreements. See "Note 4—Loans and Commitments" for additional information on the collateral pledged to secure notes payable under these programs.

We were in compliance with all covenants and conditions under our senior debt indentures as of February 28, 2017 and May 31, 2016.

## NOTE 8—SUBORDINATED DEFERRABLE DEBT

The following table presents subordinated deferrable debt outstanding as of February 28, 2017 and May 31, 2016.

	February 28, 2017			May 31, 2016		
(Dollars in thousands)		Amount	Amount			
4.75% due 2043 with a call date of April 30, 2023	\$	400,000	\$	400,000		
5.25% due 2046 with a call date of April 20, 2026		350,000		350,000		
Debt issuance costs		(7,759)		(7,788)		
Total subordinated deferrable debt	\$	742,241	\$	742,212		

# NOTE 9—DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

## **Use of Derivatives**

We are an end user of derivative financial instruments and do not engage in derivative trading. We use derivatives, primarily interest rate swaps and Treasury rate locks, to manage interest rate risk. Derivatives may be privately negotiated contracts, which are often referred to as over-the-counter ("OTC") derivatives, or they may be listed and traded on an exchange. We generally engage in OTC derivative transactions.

## Accounting for Derivatives

In accordance with the accounting standards for derivatives and hedging activities, we record derivative instruments at fair value as either a derivative asset or derivative liability on our condensed consolidated balance sheets. We report derivative asset and liability amounts on a gross basis based on individual contracts, which does not take into consideration the effects of master netting agreements or collateral netting. Derivatives in a gain position are reported as derivative liabilities. Accrued interest related to derivatives is reported on our condensed consolidated balance sheets as a component of either accrued interest and other receivables or accrued interest payable.

If we do not elect hedge accounting treatment, changes in the fair value of derivative instruments, which consist of net accrued periodic derivative cash settlements and derivative forward value amounts, are recognized in our consolidated statements of operations under derivative gains (losses). If we elect hedge accounting treatment for derivatives, we formally document, designate and assess the effectiveness of the hedge relationship. Changes in the fair value of derivatives designated as qualifying fair value hedges are recorded in earnings together with offsetting changes in the fair value of the hedge item and any related ineffectiveness. Changes in the fair value of derivatives designated as qualifying cash flow hedges are recorded as a component of OCI, to the extent that the hedge relationships are effective, and reclassified AOCI to earnings using the effective interest method over the term of the forecasted transaction. Any ineffectiveness in the hedging relationship is recognized as a component of derivative gains (losses) in our consolidated statement of operations.

We generally do not designate interest rate swaps, which currently represent all of our outstanding derivatives, for hedge accounting. Accordingly, changes in the fair value of interest rate swaps are reported in our consolidated statements of operations under derivative gains (losses). Net periodic cash settlements related to interest rate swaps are classified as an operating activity in our consolidated statements of cash flows.

We typically designate treasury rate locks as cash flow hedges of forecasted debt issuances. Accordingly, changes in the fair value of the derivative instruments are recorded as a component of OCI and reclassified to interest expense when the forecasted transaction occurs using the effective interest method. Any ineffectiveness in the hedging relationship is recognized as a component of derivative gains (losses) in our consolidated statements of operations. We did not have any derivatives designated as accounting hedges as of February 28, 2017 and May 31, 2016.

## **Outstanding Notional Amount of Derivatives**

The notional amount provides an indication of the volume of our derivatives activity, but this amount is not recorded on our condensed consolidated balance sheets. The notional amount is used only as the basis on which interest payments are determined and is not the amount exchanged. The following table shows the outstanding notional amounts and the weighted-average rate paid and received for our interest rate swaps, by type, as of February 28, 2017 and May 31, 2016. The substantial majority of our interest rate swaps use an index based on the London Interbank Offered Rate ("LIBOR") for either the pay or receive leg of the swap agreement.

	F	ebruary 28, 201	7	May 31, 2016					
(Dollars in thousands)	Notional Amount	Weighted- Average Rate Paid	Weighted- Average Rate Received	Notional Amount	Weighted- Average Rate Paid	Weighted- Average Rate Received			
Pay-fixed swaps	\$ 6,680,825	2.86%	1.01%	\$ 6,661,471	2.95%	0.63%			
Receive-fixed swaps	4,399,000	1.50	2.58	3,499,000	1.02	2.82			
Total interest rate swaps	11,079,825	2.32	1.64	10,160,471	2.29	1.39			
Forward pay-fixed swaps	111,929			40,000					
Total	\$11,191,754			\$10,200,471					

## Impact of Derivatives on Condensed Consolidated Balance Sheets

The following table displays the fair value of the derivative assets and derivative liabilities recorded on our condensed consolidated balance sheets and the related outstanding notional amount of our interest rate swaps as of February 28, 2017 and May 31, 2016.

		February	28, 2	017	May 31, 2016					
(Dollars in thousands)	1	Fair Value	No	tional Balance		Fair Value	Notional Balance			
Derivative assets	\$	83,850	\$	4,021,137	\$	80,095	\$	2,879,567		
Derivative liabilities		(339,809)		7,170,617		(594,820)		7,320,904		
Total	\$	(255,959)	\$	11,191,754	\$	(514,725)	\$	10,200,471		

All of our master swap agreements include legally enforceable netting provisions that allow for offsetting of all contracts with a given counterparty in the event of default by one of the two parties. However, as indicated above, we report derivative asset and liability amounts on a gross basis by individual contracts. The following table presents the gross fair value of derivative assets and liabilities reported on our condensed consolidated balance sheets as of February 28, 2017 and May 31, 2016, and provides information on the impact of netting provisions and collateral pledged.

	February 28, 2017

Interest rate swaps		594,820		—		594,820		80,095		_	51	4,725		

## Impact of Derivatives on Condensed Consolidated Statements of Operations

Derivative gains (losses) reported in our condensed consolidated statements of operations consist of derivative cash settlements and derivative forward value. Derivative cash settlements represent net contractual interest expense accruals on interest rate swaps during the period. The derivative forward value represents the change in fair value of our interest rate swaps during the reporting period due to changes in the estimate of future interest rates over the remaining life of our derivative contracts.

The following table presents the components of the derivative gains (losses) reported in our condensed consolidated statements of operations for our interest rate swaps for the three and nine months ended February 28, 2017 and February 29, 2016.

		Three Mon	ths End	led		Nine Mont	ths Ended			
(Dollars in thousands)	Febr	uary 28, 2017	Febr	ruary 29, 2016	Febr	uary 28, 2017	Feb	ruary 29, 2016		
Derivative cash settlements	\$	(19,354)	\$	(22,556)	\$	(64,331)	\$	(65,285)		
Derivative forward value gains (losses)		61,809		(220,480)		259,153		(290,952)		
Derivative gains (losses)	\$	42,455	\$	(243,036)	\$	194,822	\$	(356,237)		

## **Credit-Risk-Related Contingent Features**

Our derivative contracts typically contain mutual early termination provisions, generally in the form of a credit rating trigger. Under the mutual credit rating trigger provisions, either counterparty may, but is not obligated to, terminate and settle the agreement if the credit rating of the other counterparty falls to a level specified in the agreement. If a derivative contract is terminated, the amount to be received or paid by us would be equal to the mark-to-market value, as defined in the agreement, as of termination date.

Our senior unsecured credit ratings from Moody's and S&P were A2 and A, respectively, as of February 28, 2017. Both Moody's and S&P had our ratings on stable outlook as of February 28, 2017. The following table displays the notional amounts of our derivative contracts with rating triggers as of February 28, 2017 and the payments that would be required if the contracts were terminated as of that date because of a downgrade of our unsecured credit ratings or the counterparty's unsecured credit ratings below A3/A-, below Baa1/BBB+, to or below Baa2/BBB, below Baa3/BBB-, or to or below Ba2/BB+ by Moody's or S&P, respectively. In calculating the payment amounts that would be required upon termination of the derivative contracts, we assumed that the amounts for each counterparty would be netted in accordance with the provisions of the master netting agreements for each counterparty. The net payment amounts are based on the fair value of the underlying derivative instrument, excluding the credit risk valuation adjustment, plus any unpaid accrued interest amounts.

(Dollars in thousands)		Notional Amount	ayable Due From CFC	 eceivable le to CFC	Net (Payable)/ Receivable	
Impact of rating downgrade trigger:	_					
Falls below A3/A- <sup>(1)</sup>	\$	59,165	\$ (14,246)	\$ _	\$	(14,246)
Falls below Baa1/BBB+		7,156,973	(163,243)	5,874		(157,369)
Falls to or below Baa2/BBB <sup>(2)</sup>		460,611		2,030		2,030
Falls below Baa3/BBB		370,585	(20,734)	_		(20,734)
Total	\$	8,047,334	\$ (198,223)	\$ 7,904	\$	(190,319)

<sup>(1)</sup> Rating trigger for CFC falls below A3/A-, while rating trigger for counterparty falls below Baa1/BBB+ by Moody's or S&P, respectively.

<sup>(2)</sup> Rating trigger for CFC falls to or below Baa2/BBB, while rating trigger for counterparty falls to or below Ba2/BB+ by Moody's or S&P, respectively.

The aggregate fair value amount, excluding and including the credit risk valuation adjustment, of all interest rate swaps with rating triggers that were in a net liability position was \$198 million and \$197 million, respectively, as of February 28, 2017.

# NOTE 10-EQUITY

Total equity increased by \$330 million during the nine months ended February 28, 2017 to \$1,147 million. The increase in total equity was primarily attributable to our net income of \$361 million for the period, which was partially offset by patronage capital retirements totaling \$43 million. The following table presents the components of equity as of February 28, 2017 and May 31, 2016.

(Dollars in thousands)	Febr	1ary 28, 2017	М	ay 31, 2016
Membership fees	\$	971	\$	974
Educational fund		1,158		1,798
Total membership fees and educational fund		2,129		2,772
Patronage capital allocated		671,260		713,853
Members' capital reserve		587,219		587,219
Unallocated net loss:				
Current-year derivative forward value income (loss)		255,018		(220,827)
Prior-year cumulative derivative forward value losses		(507,904)		(287,077)
Current year cumulative derivative forward value losses		(252,886)		(507,904)
Other unallocated net income (loss)		98,095		(5,706)
Unallocated net loss		(154,791)		(513,610)
CFC retained equity		1,105,817		790,234
Accumulated other comprehensive income		12,574		1,058
Total CFC equity		1,118,391		791,292
Noncontrolling interests		28,947		26,086
Total equity	\$	1,147,338	\$	817,378

In July 2016, the CFC Board of Directors authorized the allocation of the fiscal year 2016 net earnings as follows: \$1 million to the Cooperative Educational Fund, \$86 million to the members' capital reserve and \$84 million to members in the form of patronage capital.

In July 2016, the CFC Board of Directors authorized the retirement of allocated net earnings totaling \$42 million, representing 50% of the fiscal year 2016 allocation. This amount was returned to members in cash in the second quarter of fiscal year 2017. Future allocations and retirements of net earnings may be made annually as determined by the CFC Board of Directors with due regard for its financial condition. The CFC Board of Directors has the authority to change the current practice for allocating and retiring net earnings at any time, subject to applicable laws and regulations.

## **Accumulated Other Comprehensive Income**

The following tables summarize, by component, the activity in AOCI as of and for the three and nine months ended February 28, 2017 and February 29, 2016.

Three Months Ended February 28, 2017

We expect to reclassify approximately \$1 million of amounts in AOCI related to unrealized derivative gains into earnings over the next 12 months.

#### NOTE 11—GUARANTEES

The following table summarizes total guarantees by type of guarantee and member class as of February 28, 2017 and May 31, 2016.

(Dollars in thousands)	February 28, 2017		Μ	ay 31, 2016
Total by type:				
Long-term tax-exempt bonds	\$	469,080	\$	475,965
Letters of credit		304,359		319,596
Other guarantees		114,045		113,647
Total	\$	887,484	\$	909,208
Total by member class:				
CFC:				
Distribution	\$	124,256	\$	127,890
Power supply		736,970		759,345
Statewide and associate		5,061		5,054
CFC total		866,287		892,289
RTFC		1,574		1,574
NCSC		19,623		15,345
Total	\$	887,484	\$	909,208

The maturities for the long-term tax-exempt bonds and the related guarantees run through calendar year 2042. Amounts in the table represent the outstanding principal amount of the guaranteed bonds. As of February 28, 2017, our maximum potential exposure for the \$68 million of fixed-rate tax-exempt bonds is \$95 million, representing principal and interest. Of the amounts shown in the table above for long-term tax-exempt bonds, \$401 million and \$406 million as of February 28, 2017 and May 31, 2016, respectively, are adjustable or floating-rate bonds that may be converted to a fixed rate as specified in the applicable indenture for each bond offering. We are unable to determine the maximum amount of interest that we could be required to pay related to the remaining adjustable and floating-rate bonds. Many of these bonds have a call provision that allows us to call the bond in the event of a default. This would limit our exposure to future interest payments

on these bonds. Generally our maximum potential exposure is secured by mortgage liens on the systems' assets and future revenue. If a system's debt is accelerated because of a determination that the interest thereon is not tax-exempt, the system's obligation to reimburse us for any guarantee payments will be treated as a long-term loan.

The maturities for letters of credit run through calendar year 2027. The amounts shown in the table above represent our maximum potential exposure, of which \$130 million is secured as of February 28, 2017. As of February 28, 2017 and May 31, 2016, the letters of credit include \$76 million to provide the standby liquidity for adjustable and floating-rate tax-exempt bonds issued for the benefit of our members, respectively. Security provisions include a mortgage lien on substantially all of the system's assets, future revenue and the system's investment in our commercial paper.

In addition to the letters of credit listed in the table above, under master letter of credit facilities in place as of February 28, 2017, we may be required to issue up to an additional \$64 million in letters of credit to third parties for the benefit of our members. As of February 28, 2017, all of our master letter of credit facilities were subject to material adverse change clauses at the time of issuance. Prior to issuing a letter of credit, we would confirm that there has been no material adverse change in the business or condition, financial or otherwise, of the borrower since the time the loan was approved and confirm that the borrower is currently in compliance with the letter of credit terms and conditions.

The maturities for other guarantees listed in the table run through calendar year 2025. The maximum potential exposure for these other guarantees is \$115 million, all of which is unsecured.

As of February 28, 2017 and May 31, 2016, we had \$289 million and \$308 million of guarantees, respectively, representing 33% and 34%, respectively, of total guarantees, under which our right of recovery from our members was not secured.

In addition to the guarantees described above, as of February 28, 2017, we were the liquidity provider for a total of \$477 million of variable-rate tax-exempt bonds issued for our member cooperatives. While the bonds are in variable-rate mode, in return for a fee, we have unconditionally agreed to purchase bonds tendered or put for redemption if the remarketing agents are unable to sell such bonds to other investors. During the nine months ended February 28, 2017, we were not required to perform as liquidity provider pursuant to these obligations.

## **Guarantee Liability**

As of February 28, 2017 and May 31, 2016, we recorded a guarantee liability of \$16 million and \$17 million respectively, which represents the contingent and noncontingent exposures related to guarantees and liquidity obligations. The contingent guarantee liability as of February 28, 2017 and May 31, 2016 was \$1 million based on management's estimate of exposure to losses within the guarantee portfolio. The remaining balance of the total guarantee liability of \$15 million and \$16 million as of February 28, 2017 and May 31, 2016, respectively, relates to our noncontingent obligation to stand ready to perform over the term of our guarantees and liquidity obligations that we have entered into or modified since January 1, 2003.

# NOTE 12—FAIR VALUE MEASUREMENT

We use fair value measurements for the initial recording of certain assets and liabilities and periodic remeasurement of certain assets and liabilities on a recurring or nonrecurring basis. The accounting guidance for fair value measurements and disclosures establishes a three-level fair value hierarchy that prioritizes the inputs into the valuation techniques used to measure fair value. The levels of the fair value hierarchy, in priority order, include Level 1, Level 2 and Level 3. For additional information regarding the fair value hierarchy and a description of the methodologies we use to measure fair value, see "Note 14—Fair Value Measurement" to the Consolidated Financial Statements in our 2016 Form 10-K. The following tables present the carrying value and fair value for all of our financial instruments, including those carried at amortized cost, as of February 28, 2017 and May 31, 2016. The table also displays the classification within the fair value hierarchy of the valuation technique used in estimating fair value.

## **Transfers Between Levels**

We monitor the availability of observable market data to assess the appropriate classification of financial instruments within the fair value hierarchy and transfer between Level 1, Level 2, and Level 3 accordingly. Observable market data includes but is not limited to quoted prices and market transactions. Changes in economic conditions or market liquidity generally will drive changes in availability of observable market data. Changes in availability of observable market data, which also may result in changes in the valuation technique used, are generally the cause of transfers between levels. We did not have any transfers between levels for financial instruments measured at fair value on a recurring basis for the nine months ended February 28, 2017 and February 29, 2016.

## **Recurring Fair Value Measurements**

The following table presents the carrying value and fair value of financial instruments reported in our condensed consolidated financial statements at fair value on a recurring basis as of February 28, 2017 and May 31, 2016, and the classification of the valuation technique within the fair value hierarchy.

	F	ebruary 28, 201	17	May 31, 2016					
(Dollars in thousands)	Level 1	Level 2	Total	Level 1	Level 2	Total			
Investment securities available for sale	\$ 90,091	\$	\$ 90,091	\$ 87,940	\$ —	\$ 87,940			
Deferred compensation investments	4,555		4,555	4,326	—	4,326			
Derivative assets		83,850	83,850		80,095	80,095			
Derivative liabilities	_	339,809	339,809		594,820	594,820			

## **Nonrecurring Fair Value**

The following table presents the carrying value and fair value of assets reported in our condensed consolidated financial statements at fair value on a nonrecurring basis as of February 28, 2017 and May 31, 2016, and unrealized losses for the three and nine months ended February 28, 2017 and February 29, 2016.

	Level 3 Fair Value				Unreali: Three Mo		Unrealized Losses Nine Months Ended,				
(Dollars in thousands)	February 2 2017	8,	May 31, 2016		February 28, 2017	F	ebruary 29, 2016	Fe	bruary 28, 2017	Fe	bruary 29, 2016
Impaired loans, net of specific reserves	\$		\$ 7,49	8 \$	_	\$	(1,890)	\$	_	\$	(3,901)

## Significant Unobservable Level 3 Inputs

## **Impaired Loans**

We utilize the fair value of estimated cash flows or the collateral underlying the loan to determine the fair value and specific allowance for impaired loans. The valuation technique used to determine fair value of the impaired loans provided by both our internal staff and third-party specialists includes market multiples (i.e., comparable companies). The significant unobservable inputs used in the determination of fair value for individually impaired loans is a multiple of earnings before interest, taxes, depreciation and amortization based on various factors (i.e., financial condition of the borrower). In estimating the fair value of the collateral, we may use third-party valuation specialists, internal estimates or a combination of both. The significant unobservable inputs for estimating the fair value of impaired collateral-dependent loans are reviewed by our Credit Risk Management group to assess the reasonableness of the assumptions used and the accuracy of the work performed. In cases where we rely on third-party inputs, we use the final unadjusted third-party valuation analysis as support for any adjustments to our consolidated financial statements and disclosures.

Because of the limited amount of impaired loans as of February 28, 2017 and May 31, 2016, we do not believe that potential changes in the significant unobservable inputs used in the determination of the fair value for impaired loans will have a material impact on the fair value measurement of these assets or our results of operations.

# NOTE 13—BUSINESS SEGMENTS

The following tables display segment results for the three and nine months ended February 28, 2017 and February 29, 2016, and assets attributable to each segment as of February 28, 2017 and February 29, 2016.

## Item 3. Quantitative and Qualitative Disclosures About Market Risk

For quantitative and qualitative disclosures about market risk, see "Part I—Item 2. MD&A—Market Risk" and "Note 9— Derivative Instruments and Hedging Activities."

## Item 4. Controls and Procedures

As of the end of the period covered by this report, senior management, including the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Based on this evaluation process, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective. There were no changes in our internal control over financial reporting that occurred during the three months ended February 28, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II—OTHER INFORMATION

## Item 1. Legal Proceedings

From time to time, CFC is subject to certain legal proceedings and claims in the ordinary course of business, including litigation with borrowers related to enforcement or collection actions. Management presently believes that the ultimate outcome of these proceedings, individually and in the aggregate, will not materially harm our financial position, liquidity, or results of operations. CFC establishes reserves for specific legal matters when it determines that the likelihood of an unfavorable outcome is probable and the loss is reasonably estimable. Accordingly, no reserve has been recorded with respect to any legal proceedings at this time. In June 2015, RTFC received a notice of deficiency from the Virgin Islands Bureau of Internal Revenue alleging that RTFC owed tax or other amounts, plus interest, in connection with tax years 1996 and 1997, and 1999 through 2005. In January 2017, the notice of deficiency was canceled and the action was jointly dismissed with prejudice. No further proceedings are anticipated at this time.

## Item 1A. Risk Factors

Refer to "Part I— Item 1A. Risk Factors" in our 2016 Form 10-K for information regarding factors that could affect our results of operations, financial condition and liquidity. We are not aware of any material changes in the risk factors set forth under "Part I— Item 1A. Risk Factors" in our 2016 Form 10-K.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

## Item 3. Defaults Upon Senior Securities

Not applicable.

## Item 4. Mine Safety Disclosures

Not applicable.

## Item 5. Other Information

None.

#### Item 6. Exhibits

The following exhibits are incorporated by reference or filed as part of this Report.

<sup>(1)</sup>Interest capitalized consists of interest paid in connection with financing the construction of our new headquarters building during the construction period. (<sup>2)</sup>Interest expense includes the amortization of debt discounts and issuance costs.

## Exhibit 31.1

# National Rural Utilities Cooperative Finance Corporation Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 1350)

I, Sheldon C. Petersen, certify that:

- 1. I have reviewed this report on Form 10-Q of National Rural Utilities Cooperative Finance Corporation;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the Audit Committee of the registrant's board of directors:
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

## Exhibit 31.2

# National Rural Utilities Cooperative Finance Corporation Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 1350)

## I, J. Andrew Don, certify that:

- 1. I have reviewed this report on Form 10-Q of National Rural Utilities Cooperative Finance Corporation;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the Audit Committee of the registrant's board of directors:
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
